SUBJECT INDEX, 2000

2,1,3-BENZOXADIAZOLE

Development of water-soluble fluorogenic reagents having a 2,1,3-benzoxadiazole structure and their application to the determination of peptides, 1115

2,4-DICHLOROPHENOXYACETIC ACID

An enzyme-linked molecularly imprinted sorbent assay, 13

1,4-DIOXANE

Trace-level determination of 1,4-dioxane in water by isotopic dilution GC and GC-MS, 1403

1,3-DIPHENYLUREA

Mercury(II) ion-selective electrode. Study of 1,3-diphenylthiourea as ionophore, 1787

17 α -ETHYNYLESTRADIOL

A molecularly imprinted polymer for 17 α -ethynylestradiol evaluated by immunoassay, 1415

ACID RAIN

Continuous and simultaneous determination of anions and cations in rainwater by ion chromatography, 1065

ACOUSTIC WAVE SENSOR

Piezoelectric quartz crystal based screening test for porcine reproductive and respiratory syndrome virus infection in pigs, 725

ADENYLATE KINASE

Oligomerization and substrate binding studies of the adenylate kinase from *Sulfobolus acidocaldarius* by matrix-assisted laser desorption/ionization mass spectrometry, 563

ADSORPTIVE VOLTAMMETRY

Adsorptive stripping voltammetric determination of ketoconazole in pharmaceutical preparations and urine using carbon paste electrodes, 1639

AIR

Fluorescent optode membrane based on organogel for humidity sensing, 301

Sampling procedures for intrinsically valid volatile organic compound measurements, 825

Specific spectrophotometric determination of hydrocyanic acid in the environment, 939

Solid-phase extraction and spectrophotometric determination of hydrogen sulfide in air and water utilizing ethylene blue formation, 1185

Method for calibrating olfactometer output. Part 2. Amyl acetate, 1295

Long-path FTIR spectroscopic studies of air pollutants in the Danube refinery plant, 1655

Assessment of X-ray photoelectron spectroscopy for analysis of particulate pollutants in urban air, 1703

Determination of superabsorbent polycrylic dust in workplace atmospheres after derivatization with ethanol and using HPLC with pulsed electrochemical detection, 1745

Temperature and humidity compensation in the determination of solvent vapors with a microsensor system, 1775

Multi-element analysis by inductively coupled plasma optical emission spectrometry of airborne particulate matter collected with a low-pressure cascade impactor, 1855

Determination of airborne methyl isocyanate as dibutylamine or 1-(2-methoxyphenyl)piperazine derivatives by liquid and gas chromatography, 1949

Dry purge for the removal of water from the solid sorbents used to sample volatile organic compounds from the atmospheric air, 2112

Sensitive fluorimetric determination of formaldehyde by the co-quenching effect of formaldehyde and sulfite on the fluorescence of tetra-substituted amino aluminium phthalocyanine, 2330

ALDEHYDES

Aromatic aldehydes as fluorogenic indicators for human aldehyde dehydrogenases and oxidases: substrate and isozyme specificity, 511

ALKALI METAL IONS

Zwitterionic vs. charge-solvated structures in the binding of arginine to alkali metal ions in the gas phase, 657

ALKALOID

Determination of morphine, oripavine and pseudomorphine using capillary electrophoresis with acidic potassium permanganate chemiluminescence detection, 91

ALLOY

Fusion method for preparation of refractory nickel based alloy powders for X-ray fluorescence spectrometry, 1681

ALUMINIUM

Direct spectrophotometric determination of aluminium oxide in Portland cement and cement clinker. An insight into the solution equilibria and analytical aspects of the aluminium-quinizarin system, 221

Differential pulse voltammetric indirect determination of aluminium in drinking waters, blood, urine, hair, and medicament samples using L-dopa under alkaline conditions, 1299

Visual fluorimetry of trace aluminium by specific immobilization with o,o'-dihydroxyazobenzene on an octadecylsilanized silica thin layer, 1667

Binding patterns of co-existing aluminium and iron to human serum transferrin studied by HPLC-high resolution ICP-MS, 1962

AMBERLITE XAD-2

Thiosalicylic acid-immobilized Amberlite XAD-2: metal sorption behaviour and applications in estimation of metal ions by flame atomic absorption spectrometry, 2350

AMINO ACID

A comparison of vancomycin and sulfated beta-cyclodextrin as chiral selectors for enantiomeric separations of selenoamino acids using capillary electrophoresis with UV absorbance detection, 231

Development of chiral HPLC for selenoamino acids with ICP-MS detection: application to selenium nutritional supplements, 281

Indirect amperometric detection of underivatized amino acids in microcolumn liquid chromatography with carbon film based ring-disk electrodes, 1041

Enhancement of luminol chemiluminescence by cysteine and glutathione, 1902

A fluorescent-labeled oligopeptide for monitoring PKA-mediated phosphorylation, 1905

Enantioselective uptake of amino acid with overoxidized polypyrrole colloid templated with L-lactate, 2249

AMINO ALCOHOL

Capillary electrophoresis as a practical tool in the study of novel rigid amino alcohols derived from (+)-camphor for catalytic enantioselective addition of organozincs to aldehydes, 185

AMPEROMETRY

A novel electrochemical microsensor for the determination of NO and its application to the study of the NO donor S-nitrosoglutathione, 163

Indirect amperometric detection of underivatized amino acids in microcolumn liquid chromatography with carbon film based ring-disk electrodes, 1041

Flow injection-pulse amperometric detection of ephedrine at a cobalt phthalocyanine modified carbon paste electrode, 1147

Renewable-surface amperometric nitrite sensor based on sol-gel-derived silicomolybdate-methylsilicate-graphite composite material, 1291

One-step electropolymerized co-immobilization of glucose oxidase and heparin for amperometric biosensing of glucose, 1431

Measurement of nitric oxide released in the rat heart with an amperometric microsensor, 1435

Amperometric detection studies of poly-o-phenylenediamine film for the determination of electroinert anions in ion-exclusion chromatography, 1453

Amperometric hydrogen peroxide biosensor based on immobilization of peroxidase in chitosan matrix crosslinked with glutaraldehyde, 1591

Simultaneous amperometric detection of electroinert anions and cations in ion chromatography, 1799

Use of supported liquid membranes incorporated in a flow system for the direct determination of eugenol in spice samples, 1805

Phasor transform to extract glucose and ascorbic acid data in an amperometric sensor, 1987

Modified microelectrodes and multivariate calibration for flow injection amperometric simultaneous determination of ascorbic acid, dopamine, epinephrine and dipyrrone, 2011

AMPHETAMINES

Derivatization of tertiary amphetamines with 9-fluorenylmethyl chloroformate for liquid chromatography: determination of N-methylephedrine, 1071

AMYL ACETATE

Method for calibrating olfactometer output. Part 2. Amyl acetate, 1295

ANABOLIC STEROIDS

Determination of three anabolic compounds in calf urine by liquid chromatography with photodiode-array detection, 2230

ANALYTE PULSE PERTURBATION

Potential of the analyte pulse perturbation technique for the determination of polyphenols based on the Belousov-Zhabotinskii reaction, 2118

ANION

Solid phase microextraction of inorganic anions based on polypyrrole film, 391

Determination of inorganic anions in biological fluids with direct sample injection by electrostatic ion chromatography using zwitterionic micelles in both stationary and mobile phases, 447

Open-tubular ion-exchange capillary electrochromatography of inorganic anions, 1235

Amperometric detection studies of poly-o-phenylenediamine film for the determination of electroinert anions in ion-exclusion chromatography, 1453

ANION-EXCHANGE CHROMATOGRAPHY

Determination of saccharides in wastewater from the beverage industry by microdialysis sampling, microbore high performance anion exchange chromatography and integrated pulsed electrochemical detection, 1379

Determination of hexavalent chromium in lime-treated sewage sludge by

- anion-exchange fast protein liquid chromatography with electrothermal atomic absorption spectrometry detection, 1938
- ANODIC-STRIPPING VOLTAMMETRY**
- Alloy electrodes with high hydrogen overvoltage for analytical use in voltammetry. Some preliminary results, 2163
- ANTIBIOTICS**
- A microtitre plate assay for the detection of antibiotics in porcine urine, 395
- High-performance liquid chromatographic assay of erythromycin from biological matrix using electrochemical or ultraviolet detection, 1077
- Application of principal component regression to luminescence data for the screening of ciprofloxacin and enrofloxacin in animal tissues, 1155
- Determination of sulfonamides by packed column supercritical fluid chromatography with atmospheric pressure chemical ionisation mass spectrometric detection, 1243
- Rapid confirmatory assay for the simultaneous detection of ronidazole, metronidazole and dimetridazole in eggs using liquid chromatography-tandem mass spectrometry, 1533
- Determination of gentamicin after trimethylsilylimidazole and trifluoroacetic anhydride derivatization using gas chromatography and negative ion chemical ionization ion trap mass spectrometry, 1573
- ANTIBODY PRODUCTION**
- Production of monoclonal antibody against a major purgative component, sennoside A, its characterization and ELISA, 1109
- ANTIMONY**
- Studies on the speciation of inorganic and organic antimony compounds in airborne particulate matter by HPLC-ICP-MS, 1025
- APO-CONCANAVALIN A**
- Binding of selected carbohydrates to apo-concanavalin A studied by electrospray ionization mass spectrometry, 583
- AQUA REGIA**
- The minimisation of *aqua regia* cross contamination in PFA and TFM microwave digestion vessels using silver as an indicator, 327
- ARGININE**
- Zwitterionic vs. charge-solvated structures in the binding of arginine to alkali metal ions in the gas phase, 657
- ARSENIC**
- Determination of arsenic in biological fluids by electrothermal atomic absorption spectrometry, 313
- Focused microwave Soxhlet device for rapid extraction of mercury, arsenic and selenium from coal prior to atomic fluorescence detection, 317
- Comparison of biota sample pretreatments for arsenic speciation with coupled HPLC-HG-ICP-MS, 401
- Use of perchloric acid as a reaction medium for speciation of arsenic by hydride generation-atomic absorption spectrometry, 949
- Application of sample pre-oxidation of arsenite in human urine prior to speciation via on-line photo-oxidation with membrane hydride generation and ICP-MS detection, 1215
- Determination of arsenic in sediment and soil slurries by electrothermal atomic absorption spectrometry using W-Rh permanent modifier, 2079
- ARTIFICIAL NEURAL NETWORKS**
- Application of artificial neural networks coupled with an orthogonal design and optimization algorithms to multifactor optimization of a new FIA system for the determination of uranium(VI) in ore samples, 921
- On-line determination of non-volatile or low-concentration metabolites in a yeast cultivation using an electronic nose, 1123
- Application of artificial neural networks for the simultaneous determination of a mixture of fluorescent dyes by synchronous fluorescence, 2049
- ASCORBIC ACID**
- Phasor transform to extract glucose and ascorbic acid data in an amperometric sensor, 1987
- ATMOSPHERIC PRESSURE CHEMICAL IONIZATION**
- Detection of diazepam in horse hair samples by mass spectrometric methods, 1765
- Simultaneous quantitative determination of norgestrel and progesterone in human serum by high-performance liquid chromatography-tandem mass spectrometry with atmospheric pressure chemical ionization, 2201
- ATOMIC ABSORPTION SPECTROMETRY**
- Analytical atomic spectrometry going into the next millennium: photons or ions, atoms or molecules?, 35
- Feasibility study of ion-chromatography microwave assisted on-line species conversion hydride generation atomic absorption spectrometry for selenium speciation analysis of biological material, 273
- Use of perchloric acid as a reaction medium for speciation of arsenic by hydride generation-atomic absorption spectrometry, 949
- Flow injection-liquid chromatography-cold vapour atomic absorption spectrometry for rapid determination of methyl and inorganic mercury, 1193
- Determination of lead in fish samples by slurry sampling electrothermal atomic absorption spectrometry, 1491
- Group speciation of metal dithiocarbamates by sorption on C₆₀ fullerene, 1495
- Comparative study of electrothermal atomic absorption spectrometric methods for the determination of silver in used lubricating oils, 1673
- Single vessel procedure for acid-vapour partial digestion in a focused microwave: Fe and Co determination in biological samples by ETAAS, 1861
- Atomic absorption spectrometric determination of trace zinc in alloys and biological samples after preconcentration with [1-(2-pyridylazo)-2-naphthol] on microcrystalline naphthalene, 1865
- Thiosalicyclic acid-immobilized Amberlite XAD-2: metal sorption behaviour and applications in estimation of metal ions by flame atomic absorption spectrometry, 2350
- ATOMIC EMISSION SPECTROMETRY**
- Analytical atomic spectrometry going into the next millennium: photons or ions, atoms or molecules?, 35
- Determination of trace zirconium and hafnium in basaltic rocks by inductively coupled plasma atomic emission spectrometry after chemical separation: an evaluation of two methods based on extraction chromatography, 453
- A drift correction procedure for ICP-AES systems, 1015
- Determination of impurity elements in high purity graphite by inductively coupled plasma atomic emission spectrometry after microwave decomposition, 1189
- Multi-element analysis by inductively coupled plasma optical emission spectrometry of airborne particulate matter collected with a low-pressure cascade impactor, 1855
- ATOMIC FLUORESCENCE SPECTROMETRY**
- Focused microwave Soxhlet device for rapid extraction of mercury, arsenic and selenium from coal prior to atomic fluorescence detection, 317
- ATOMIC FORCE MICROSCOPY**
- Probing protein-peptide-protein molecular architecture by atomic force microscopy and surface plasmon resonance, 245
- Surface energy and the response of transverse acoustic wave devices in liquids, 1525
- ATTENUATED TOTAL REFLECTANCE**
- IR chemical sensor for detection of chlorinated anilines in aqueous solutions based on ATR waveguides coated with derivatized polystyrene, 1605
- AUTOMATION**
- Sequential injection spectrophotometric analysis of nitrite in natural waters using an on-line solid-phase extraction and preconcentration method, 943
- Development of an automated method for determining oil in water by direct aqueous supercritical fluid extraction coupled on-line with infrared spectroscopy, 2356
- AVERMECTINS**
- Validation and robustness testing of a HPLC method for the determination of avermectins and moxidectin in animal liver samples using an alumina column clean-up, 1741
- 17 β -ESTRADIOL**
- Development of an electrochemical ELISA for the screening of 17 β -estradiol and application to bovine serum, 1419
- BARIUM**
- Collaborative trial in sampling for the spatial delineation of contamination and the estimation of uncertainty, 139
- BASELINE NOISE**
- Major sensitivity improvements in ion chromatography determinations involving post-column spectrophotometric reaction detectors through elimination of pump noise using a dual wavelength monitoring procedure, 803
- BEER**
- Speciation of Cu, Fe and Mn in beer using ion exchange separation and size-exclusion chromatography in combination with electrothermal atomic absorption spectrometry, 1933
- BENZENE**
- Estimation of trace amounts of benzene in solvent-extracted vegetable oils and oil seed cakes, 1687
- BENZO[a]PYRENE**
- Micellar electrokinetic chromatography of monohydroxybenzo[a]pyrene positional isomers using γ -cyclodextrin, 1555
- BENZOFURAZAN**
- Study on the fluorescent 'on-off' properties of benzofurazan compounds bearing an aromatic substituent group and design of fluorescent 'on-off' derivatization reagents, 1839
- BEVERAGE**
- A glucose biosensor with enzyme-entrapped sol-gel and an oxygen-sensitive optode membrane, 157
- BILE ACIDS**
- Bioassay of bile acids using an enzyme-linked DNA aptamer, 1371
- BIOANALYTICAL**
- Assessment of growth of *Fusarium solani* by cyclic voltammetry and possible bioanalytical applications, 2166
- BIOASSAY**
- Models for estimating the non-specific toxicity of organic compounds in short-term bioassays, 127
- Bioassay of bile acids using an enzyme-linked DNA aptamer, 1371
- Peroxidase enhanced lanthanide luminescence—a new technique for the evaluation of bioassays, 1537
- An improved assay of 3-hydroxy-3-methylglutaryl-CoA reductase activity in Reuber H35 hepatoma cells without microsomes isolation, 1583

BIOAVAILABILITY

Bioavailability studies of oral dosage forms containing levodopa and carbidopa using column-switching chromatography followed by electrochemical detection, 439

BIOCHEMICAL

Direct detection of large fat-soluble biomolecules in solution using membrane inlet mass spectrometry and desorption chemical ionization, 211

BIOLOGICAL

Nanobiotechnology and its role in the development of new analytical devices, 29

Direct detection of large fat-soluble biomolecules in solution using membrane inlet mass spectrometry and desorption chemical ionization, 211

Determination of arsenic in biological fluids by electrothermal atomic absorption spectrometry, 313

Use and analysis by thermal ionisation mass spectrometry of ^{26}Mg and ^{41}K to assess mineral uptake in Scots pine (*Pinus sylvestris* L.), 487

HPLC-electrospray mass spectrometry for the analysis of temoporfin-poly(ethylene glycol) conjugates, 605

Structural analysis of drug-DNA adducts by tandem mass spectrometry, 627

C-terminal peptide sequencing using acetylated peptides with MSⁿ in a quadrupole ion trap, 635

Characterization of ionophore-metal complexes by infrared multiphoton photodissociation and collision activated dissociation in a quadrupole ion trap mass spectrometer, 641

Rapid isolation method for lipopolysaccharide and lipid A from Gram-negative bacteria, 651

Zwitterionic vs. charge-solvated structures in the binding of arginine to alkali metal ions in the gas phase, 657

Piezoelectric quartz crystal based screening test for porcine reproductive and respiratory syndrome virus infection in pigs, 725

Quantum dot-labeled trichosanthin, 1029

On-line determination of non-volatile or low-concentration metabolites in a yeast cultivation using an electronic nose, 1123

Trichosanthin induced calcium-dependent generation of reactive oxygen species in human choriocarcinoma cells, 1539

Renewable amperometric immunoassay based on paraffin-graphite-transferrin antisera biocomposite for transferrin assay, 1595

Validation and robustness testing of a HPLC method for the determination of avermectins and moxidectin in animal liver samples using an alumina column clean-up, 1741

Atomic absorption spectrometric determination of trace zinc in alloys and biological samples after preconcentration with [1-(2-pyridylazo)-2-naphthol] on microcrystalline naphthalene, 1865

Novel flow injection methods for drug-receptor interaction studies, based on probing cell metabolism, 1889

A fluorescent-labelled oligopeptide for monitoring PKA-mediated phosphorylation, 1905

Chemiluminescence detection of nine corticosteroids in liver, 2071

Determination of three anabolic compounds in calf urine by liquid chromatography with photodiode-array detection, 2230

Enzymatic hydrolysis of conjugated steroid metabolites: search for optimum conditions using response surface methodology, 2255

A mediator-type biosensor as a new approach to biochemical oxygen demand estimation, 2280

BIOLOGICAL MATERIALS

Microdialysis sampling with on-line microbore HPLC for the determination of tirapazamine and its reduced metabolites in rats, 105

Feasibility study of ion-chromatography microwave assisted on-line species conversion hydride generation atomic absorption spectrometry for selenium speciation analysis of biological material, 273

Automatic semi-microcolumn liquid chromatographic determination of catecholamines in rat plasma utilizing peroxoxyxalate chemiluminescence reaction, 293

Separation and enrichment of palladium and gold in biological and environmental samples, adapted to the determination by total reflection X-ray fluorescence, 397

Determination and quantification of sulfadiazine and trimethoprim in swine tissues using liquid chromatography with ultraviolet and mass spectrometric detection, 409

Determination of inorganic anions in biological fluids with direct sample injection by electrostatic ion chromatography using zwitterionic micelles in both stationary and mobile phases, 447

Direct cellular assays using off-line capillary electrophoresis with matrix-assisted laser desorption/ionization time-of-flight mass spectrometry, 555

Identification of major histocompatibility complex class II-associated peptides derived from freshly prepared rat Langerhans cells using MALDI-PSD and Edman degradation, 569

Direct determination of *L,L*-muconic acid in human urine by two-dimensional liquid chromatography, 689

Determination of mercury species by capillary zone electrophoresis-inductively coupled plasma mass spectrometry: a comparison of two spray chamber-nebulizer combinations, 705

Determination of estrone and 17 β -estradiol in human hair by gas chromatography-mass spectrometry, 711

Determination of mercapturic acids in urine by solid-phase extraction followed by liquid chromatography-electrospray ionization mass spectrometry, 715

Differentiation of *Scutellariae Radix* from *Astragali Radix* by capillary electrophoresis with electrochemical detection, 815

Bio-inorganic speciation analysis by hyphenated techniques, 963

High-performance liquid chromatographic assay of erythromycin from biological matrix using electrochemical or ultraviolet detection, 1077

Measurement of β -agonist residues in retinal tissue of food producing animals, 1103

Application of principal component regression to luminescence data for the screening of ciprofloxacin and enrofloxacin in animal tissues, 1155

Use of partial least-squares regression for multicomponent determinations based on kinetic spectrofluorimetric data. Simultaneous determination of canrenone and spironolactone in urine, 1159

Fast urinary screening for paracetamol using on-line microwave assisted hydrolysis and spectrophotometric detection, 1179

Differential pulse voltammetric indirect determination of aluminium in drinking waters, blood, urine, hair, and medicament samples using L-dopa under alkaline conditions, 1299

Report by the Analytical Methods Committee. Nitrogen factors for chicken meat, 1359

A molecularly imprinted polymer for 17 α -ethynodiol evaluated by immunoassay, 1415

Measurement of nitric oxide released in the rat heart with an amperometric microsensor, 1435

Rapid confirmatory assay for the simultaneous detection of ronidazole, metronidazole and dimetridazole in eggs using liquid chromatography-tandem mass spectrometry, 1533

Trichosanthin induced calcium-dependent generation of reactive oxygen species in human choriocarcinoma cells, 1539

Clean-up, detection and determination of salbutamol in human urine and serum, 1569

An improved assay of 3-hydroxy-3-methylglutaryl-CoA reductase activity in Reuber H35 hepatoma cells without microsomes isolation, 1583

Single vessel procedure for acid-vapour partial digestion in a focused microwave: Fe and Co determination in biological samples by ETAAS, 1861

Normal and differential demasking flow-injection manifold for the direct spectrophotometric determination of zinc(II) in biological materials and pharmaceutical formulations, 2106

Point-of-need diagnosis of cystic fibrosis using a potentiometric ion-selective electrode array, 2264

BIOSENSOR

Reagentless enzyme electrode based on phenothiazine mediation of horseradish peroxidase for subnanomolar hydrogen peroxide determination, 79

An electrochemiluminescence-based fibre optic biosensor for choline flow injection analysis, 151

A glucose biosensor with enzyme-entrapped sol-gel and an oxygen-sensitive optode membrane, 157

A new type of reusable piezoelectric biosensor fabricated by a recombinant IgG-binding protein, 669

Novel glucose non-interference biosensor for lactose detection based on galactose oxidase-peroxidase with and without co-immobilised β -galactosidase, 1285

Fluorescence IgG immunosensor based on a micro flow cell containing controlled pore glass as immobilisation support, 1387

One-step electropolymeric co-immobilization of glucose oxidase and heparin for amperometric biosensing of glucose, 1431

The development of an improved glucose biosensor using recombinant carbohydrate oxidase from *Microdochium niveum*, 1587

Amperometric hydrogen peroxide biosensor based on immobilization of peroxidase in chitosan matrix crosslinked with glutaraldehyde, 1591

Biosensor assay of sulfadiazine and sulfamethazine residues in pork, 1771

Optical biosensing of nitrite ions using cytochrome *c1* nitrite reductase encapsulated in a sol-gel matrix, 1993

Disposable, low cost, silver-coated, piezoelectric quartz crystal biosensor and electrode protection, 2268

A mediator-type biosensor as a new approach to biochemical oxygen demand estimation, 2280

Mathematical analysis for impedance change with proteolytic digestion of gelatin, 2289

BIOTA

Comparison of biota sample pretreatments for arsenic speciation with coupled HPLC-HG-ICP-MS, 401

BIOTIN

Probing protein-peptide-protein molecular architecture by atomic force microscopy and surface plasmon resonance, 245

BITUMEN

Determination of the penetration value of bitumens by near infrared spectroscopy, 1823

BLOOD

Differential pulse voltammetric indirect determination of aluminium in drinking waters, blood, urine, hair, and medicament samples using L-dopa under alkaline conditions, 1299

- Efficient sample pre-concentration of bupivacaine from human plasma by solid-phase extraction on molecularly imprinted polymers, 1515
- Determination of 4-nonylphenol and 4-octylphenol in human blood samples by high-performance liquid chromatography with multi-electrode electrochemical coulometric-array detection, 1959
- Simultaneous quantitative determination of norgestrel and progesterone in human serum by high-performance liquid chromatography-tandem mass spectrometry with atmospheric pressure chemical ionization, 2201
- BORON**
- Determination of boron in uniformly-doped silicon thin films by isotope dilution inductively coupled plasma mass spectrometry, 493
- Automated *in situ* preparation of Azomethine-H and the subsequent determination of boron in fertilizer process and water effluent streams with sequential injection analysis, 2094
- BRAIN**
- Studies on neurosteroids. Part XIII. Characterization of catechol estrogens in rat brains using liquid chromatography-mass spectrometry-mass spectrometry, 811
- BUTTER**
- Simultaneous determination of fat-soluble vitamins and provitamins in dairy products by liquid chromatography with a narrow-bore column, 427
- BUTYLTINS**
- A quantitative extraction method for the determination of trace amounts of both butyl- and phenyltin compounds in sediments by gas chromatography-inductively coupled plasma mass spectrometry, 1757
- C-DOPA**
- Bioavailability studies of oral dosage forms containing levodopa and carbidopa using column-switching chromatography followed by electrochemical detection, 439
- CADMIUM**
- Development and characterization of a novel electrochemiluminescent reaction involving cadmium, 2065
- CAESIUM**
- Coprecipitating ammonium-iron(III)-hexacyanoferrate(II) from aqueous dispersion with albumin and trichloroacetic acid, 855
- CAFFINE**
- HPLC determination of catechins and caffeine in tea. Differentiation of green, black and instant teas, 421
- Automated in-tube solid phase microextraction coupled with HPLC-ES-MS for the determination of catechins and caffeine in tea, 2216
- CALCIUM CARBONATE**
- Calcium carbonate phase analysis using XRD and FT-Raman spectroscopy, 251
- CALIBRATION**
- A simple, all-purpose nonlinear algorithm for univariate calibration, 1045
- Flow injection analysis of fluoride: optimization of experimental conditions and non-linear calibration using artificial neural networks, 2376
- CALIXARENE**
- Preparation and characteristics of two novel calix[4]arene polysiloxane stationary phases for capillary gas chromatography, 843
- CAPILLARY ELECTROCHROMATOGRAPHY**
- Electro-osmotic and pressure-driven flow properties of frits for packed column capillary electrochromatography prepared from functionalised and bare silica packings, 1
- On-capillary ion-exchange preconcentration of inorganic anions using open-tubular capillaries followed by elution with a transient isotachopheric gradient, 799
- Molecularly imprinted microparticles for capillary electrochromatographic enantiomer separation of propranolol, 1899
- CAPILLARY ELECTROPHORESIS**
- Determination of morphine, oripavine and pseudomorphine using capillary electrophoresis with acidic potassium permanganate chemiluminescence detection, 91
- A capillary electrophoresis microchip for the analysis of photographic developer solutions using indirect fluorescence detection, 133
- Capillary electrophoresis as a practical tool in the study of novel rigid amino alcohols derived from (+)-camphor for catalytic enantioselective addition of organozincs to aldehydes, 185
- A comparison of vancomycin and sulfated beta-cyclodextrin as chiral selectors for enantiomeric separations of selenoamino acids using capillary electrophoresis with UV absorbance detection, 231
- Evaluation of analytical instrumentation. Part XII. Instrumentation for capillary electrophoresis, 361
- Direct cellular assays using off-line capillary electrophoresis with matrix-assisted laser desorption/ionization time-of-flight mass spectrometry, 555
- Use of capillary electrophoresis and indirect detection to quantitate in-capillary enzyme-catalyzed microreactions, 685
- Differentiation of *Scutellariae Radix* from *Astragali Radix* by capillary electrophoresis with electrochemical detection, 815
- Violet (405 nm) diode laser for laser induced fluorescence detection in capillary electrophoresis, 1049
- Electrophoretic behavior study and determination of some active components in Chinese medicinal preparations by capillary electrophoresis, 1083
- Dissociation of ribulose-1,5-bisphosphate carboxylase/oxygenase (Rubisco) observed by capillary electrophoresis, 1087
- Open-tubular ion-exchange capillary electrochromatography of inorganic anions, 1235
- Spline wavelet self-convolution in processing overlapped peaks in capillary electrophoresis, 1303
- Pulsed potentiometric detection in capillary electrophoresis using platinum electrodes, 1519
- Aqueous and non-aqueous capillary electrophoresis of polar drugs, 1561
- Tetraethylammonium tetrafluoroborate: a novel electrolyte with a unique role in the capillary electrophoretic separation of polyphenols found in grape seed extracts, 1919
- Enzymatic activity measurement of phospholipid hydroperoxide glutathione peroxidase by capillary electrophoresis, 1924
- mRNA isolation in a microfluidic device for eventual integration of cDNA library construction, 2176
- Comparative study of capillary zone electrophoresis and micellar electrokinetic capillary chromatography for the separation of naphthalenedisulfonate isomers, 2236
- Rejection of capillary wall background light in an on-column confocal fluorescence detector, 2241
- CAPILLARY ISOELECTRIC FOCUSING**
- Axially illuminated fluorescence imaging detection for capillary isoelectric focusing on Teflon capillary, 1231
- CAPILLARY ZONE ELECTROPHORESIS**
- Analysis of ion association reactions in aqueous solutions between alkali metal-crown ether complexes and pairing anions by capillary zone electrophoresis, 699
- Determination of mercury species by capillary zone electrophoresis-inductively coupled plasma mass spectrometry: a comparison of two spray chamber-nebulizer combinations, 705
- Ion association reactions in aqueous solutions between non-UV-absorbing crown ether-alkali metal complexes with picrate ion by capillary zone electrophoresis, 1928
- CARBARYL**
- Retention of carbaryl by polyether type polyurethane foam: a critical study, 257
- CARBENDAZIM**
- Trace determination of carbendazim, fuberidazole and thiabendazole in water by application of multivariate calibration to cross-sections of three-dimensional excitation-emission matrix fluorescence, 1167
- CARBOHYDRATE**
- Binding of selected carbohydrates to apo-concanavalin A studied by electrospray ionization mass spectrometry, 583
- CARBON-14**
- Determination of carbon-14 levels in heavy water and groundwaters, 59
- CARBONATE**
- Carbonate removal from concentrated hydroxide solutions, 955
- CARBONYLS**
- Determination of carbonyl compounds in waters using triazine-based hydrazine reagents and liquid chromatography, 433
- CASCADE IMPACTOR**
- Multi-element analysis by inductively coupled plasma optical emission spectrometry of airborne particulate matter collected with a low-pressure cascade impactor, 1855
- CATECHINS**
- HPLC determination of catechins and caffeine in tea. Differentiation of green, black and instant teas, 421
- Automated in-tube solid phase microextraction coupled with HPLC-ES-MS for the determination of catechins and caffeine in tea, 2216
- CATECHOLAMINE**
- Automatic semi-microcolumn liquid chromatographic determination of catecholamines in rat plasma utilizing peroxyxalate chemiluminescence reaction, 293
- CATION**
- Simultaneous separation of common mono- and divalent cations by ion chromatography with indirect photometric detection using an unmodified silica gel column and tyramine-oxalic acid-15-crown-5 as eluent, 269
- The ion chromatographic separation of high valence metal cations using a neutral polystyrene resin dynamically modified with dipicolinic acid, 2157
- CATTLE**
- Chemiluminescence detection of nine corticosteroids in liver, 2071
- CAVITY RINGDOWN SPECTROMETRY**
- Determination of elemental mercury by cavity ringdown spectrometry, 1021
- CELLULAR AUTO-FLOURESCENCE**
- The application of fluorescence polarisation for the enhanced detection of green fluorescent protein (GFP) in the presence of cellular auto-fluorescence and other green fluorescent compounds, 499
- CEMENT**
- Direct spectrophotometric determination of aluminium oxide in Portland cement and cement clinker. An insight into the solution equilibria and analytical aspects of the aluminium-quinizarin system, 221
- CHARGE COUPLED DEVICE**
- Acquisition of chemiluminescence spectral profiles using a continuous flow manifold with two dimensional CCD detection, 387

CHELATION

Properties of chelating sorbents prepared by impregnation of LiChroprep RP-8 and LiChroprep RP-18 with ion pairs formed by Aliquat 336 and Nitroso-R-Salt, 297

CHEMICAL IONIZATION

Direct detection of large fat-soluble biomolecules in solution using membrane inlet mass spectrometry and desorption chemical ionization, 211

Determination of sulfonamides by packed column supercritical fluid chromatography with atmospheric pressure chemical ionisation mass spectrometric detection, 1243

Electrospray and APCI analysis of polyhydroxyalkaloids using positive and negative collision induced dissociation experiments in a quadrupole ion trap, 1409

Determination of gentamicin after trimethylsilylimidazole and trifluoroacetic anhydride derivatization using gas chromatography and negative ion chemical ionization ion trap mass spectrometry, 1573

Determination of steroid hormones by membrane inlet mass spectrometry and desorption chemical ionization, 1577

Determination of pesticides in soil samples by supercritical fluid chromatography-atmospheric pressure chemical ionisation mass spectrometric detection, 1751

CHEMILUMINESCENCE

Determination of cobalt and iron in estuarine and coastal waters using flow injection with chemiluminescence detection, 51

Determination of morphine, oripavine and pseudomorphine using capillary electrophoresis with acidic potassium permanganate chemiluminescence detection, 91

Automatic semi-microcolumn liquid chromatographic determination of catecholamines in rat plasma utilizing peroxyoxalate chemiluminescence reaction, 293

Acquisition of chemiluminescence spectral profiles using a continuous flow manifold with two dimensional CCD detection, 387

Phenol substituent effects on electrogenerated chemiluminescence quenching, 545

On-line monitoring of chromium(III) using a fast micromachined mixer/reactor and chemiluminescence detection, 677

Flow injection chemiluminescence determination of

N-tetrahydrobenzothiazolyl imines, 753

Chemiluminescence determination of iodide and/or iodine using a luminol-hexadecyltrimethylammonium chloride reversed micelle system following on-line oxidation and extraction, 759

Determination of morpholine fungicides using the tris(2,2'-bipyridine) ruthenium(II) chemiluminescence reaction, 765

Luminol electrochemiluminescence with screen-printed electrodes for low-cost disposable oxidase-based optical sensors, 789

Chemiluminometric determination of reserpine and related alkaloids, 1307

Enhanced chemiluminescent determination of chloramphenicol and related nitro compounds by 'on-line' photochemical reaction, 1313

Pulsed flow chemistry: a new approach to solution handling for flow analysis coupled with chemiluminescence detection, 1869

Enhancement of luminol chemiluminescence by cysteine and glutathione, 1902

Chemiluminescence detection of nine corticosteroids in liver, 2071

Chemiluminescence of indole compounds based on oxidation with singlet oxygen generated chemically by the sodium molybdate-hydrogen peroxide system, 2075

The enhanced electrogenerated chemiluminescence of Ru(bpy)₃²⁺ by glutathione on a glassy carbon electrode modified with some porphine compounds, 2294

CHEMOMETRICS

Deconvolution of a three-component co-eluting peak cluster in gas chromatography-mass spectrometry, 287

Authentication of Galician (N.W. Spain) honeys by multivariate techniques based on metal content data, 307

The generalized H-point standard-additions method to determine analytes present in two different chemical forms in unknown matrix samples Part II. Cr(VI) determination in water samples by absorption spectrophotometry, 777

Quantitative resolution of overlapping tailing peaks obtained by diode-array detector high performance liquid chromatography in the absence of pure standards using simple chemical knowledge, 833

Resolution by polarographic techniques of atrazine-simazine and terbutryn-prometryn binary mixtures by using PLS calibration and artificial neural networks, 909

A simple, all-purpose nonlinear algorithm for univariate calibration, 1045

Evaluation of similarities between natural and accelerated browning of fino sherry wines by chemometric techniques, 1151

Trace determination of carbendazim, fuberidazole and thiabendazole in water by application of multivariate calibration to cross-sections of three-dimensional excitation-emission matrix fluorescence, 1167

Spline wavelet self-convolution in processing overlapped peaks in capillary electrophoresis, 1303

Estimation of precision and efficiency mass transfer steps for the determination of pesticides in vegetables aiming at the expression of results with reliable uncertainty, 1459

Optimization of a new activated carbon based sorbent for on-line

preconcentration and trace determination of nickel in aquatic samples using mixed-level orthogonal array design, 1649

Multivariate analysis of reagent profiles for slow reactions using PLS analysis, 1709

Towards a unified model of errors in analytical measurement, 2020

Sampling proficiency test for the estimation of uncertainty in the spatial delineation of contamination, 2026

The potential of multivariate quality control as a diagnostic tool in geoanalysis, 2032

Strategies for solving matrix effects in the analysis of triphenyltin in sea-water samples by three-way multivariate curve resolution, 2038

Principal component analysis and cluster analysis for the characterization of dental composites, 2044

Application of artificial neural networks for the simultaneous determination of a mixture of fluorescent dyes by synchronous fluorescence, 2049

Non-invasive determination of ethanol, propylene glycol and water in multi-component pharmaceutical oral liquid by direct measurement through amber plastic bottles using Fourier transform near-infrared spectroscopy, 2054

Introduction to multivariate calibration in analytical chemistry, 2125

A PARAFAC algorithm using penalty diagonalization error (PDE) for three-way data array resolution, 2303

CHIRAL SEPARATION

Enantioselective supercritical fluid chromatography using Ristocetin A chiral stationary phases, 1037

Continuous free flow electrophoresis for preparative chiral separations of piperoxan using sulfated β -cyclodextrin, 1719

CHIRALITY

Chiral-discriminative amino acid films prepared by vacuum vaporization and/or plasma processing, 169

CHLORAMPHENICOL

Enhanced chemiluminescent determination of chloramphenicol and related nitro compounds by 'on-line' photochemical reaction, 1313

CHLORINATED ANILINE

IR chemical sensor for detection of chlorinated anilines in aqueous solutions based on ATR waveguides coated with derivatized polystyrene, 1605

CHOLINE

An electrochemiluminescence-based fibre optic biosensor for choline flow injection analysis, 151

Luminol electrochemiluminescence with screen-printed electrodes for low-cost disposable oxidase-based optical sensors, 789

CHROMIUM

On-line monitoring of chromium(III) using a fast micromachined mixer/reactor and chemiluminescence detection, 677

Chromium speciation analysis by solid-phase extraction on a high surface area TiO₂, 693

The generalized H-point standard-additions method to determine analytes present in two different chemical forms in unknown matrix samples Part II. Cr(VI) determination in water samples by absorption spectrophotometry, 777

Determination of hexavalent chromium in lime-treated sewage sludge by anion-exchange fast protein liquid chromatography with electrothermal atomic absorption spectrometry detection, 1938

CHRONOAMPEROMETRY

Nitric oxide solutions: standardisation by chronoamperometry using a platinum disc microelectrode, 1629

CLINICAL

Determination of 4-nonylphenol and 4-octylphenol in human blood samples by high-performance liquid chromatography with multi-electrode electrochemical coulometric-array detection, 1959

Point-of-need diagnosis of cystic fibrosis using a potentiometric ion-selective electrode array, 2264

CLUSTER ANALYSIS

Principal component analysis and cluster analysis for the characterization of dental composites, 2044

COAL

Focused microwave Soxhlet device for rapid extraction of mercury, arsenic and selenium from coal prior to atomic fluorescence detection, 317

COBALT

Determination of cobalt and iron in estuarine and coastal waters using flow injection with chemiluminescence detection, 51

Single vessel procedure for acid-vapour partial digestion in a focused microwave: Fe and Co determination in biological samples by ETAAS, 1861

Enhancement of luminol chemiluminescence by cysteine and glutathione, 1902

COLLISION INDUCED DISSOCIATION

Electrospray and APCI analysis of polyhydroxyalkaloids using positive and negative collision induced dissociation experiments in a quadrupole ion trap, 1409

COLORIMETRY

A microtitre plate assay for the detection of antibiotics in porcine urine, 395

COLUMN-SWITCHING CHROMATOGRAPHY

Bioavailability studies of oral dosage forms containing levodopa and

- carbidopa using column-switching chromatography followed by electrochemical detection, 439
- COMPLEXOMETRIC PROPERTIES**
- Electrochemical studies of complexation of Pb in red wines, 743
- COMPOSITION PROFILING**
- Composition profiling of seized ecstasy tablets by Raman spectroscopy, 1811
- CONFOCAL MICROSCOPY**
- Single-molecule detection using confocal fluorescence detection: Assessment of optical probe volumes, 1033
- CONTINUOUS FLOW MANIFOLD**
- Acquisition of chemiluminescence spectral profiles using a continuous flow manifold with two dimensional CCD detection, 387
- CONTINUOUS FREE FLOW ELECTROPHORESIS**
- Continuous free flow electrophoresis for preparative chiral separations of piperoxan using sulfated β -cyclodextrin, 1719
- COPPER**
- Nano-electrospray and microbore liquid chromatography-ion trap mass spectrometry studies of copper complexation with MHC restricted peptides, 599
- The use of a remote stripping sensor for the determination of copper and mercury in the Lagoon of Venice, 731
- Indirect determination of thiocyanate with ammonium sulfate and ethanol by extraction-flotation of copper, 1885
- Speciation of Cu, Fe and Mn in beer using ion exchange separation and size-exclusion chromatography in combination with electrothermal atomic absorption spectrometry, 1933
- COPRECIPITATION**
- Coprecipitating ammonium–iron(III)–hexacyanoferrate(II) from aqueous dispersion with albumin and trichloroacetic acid, 855
- CORTICOSTEROIDS**
- Chemiluminescence detection of nine corticosteroids in liver, 2071
- COULOMETRY**
- Determination of 4-nonylphenol and 4-octylphenol in human blood samples by high-performance liquid chromatography with multi-electrode electrochemical coulometric-array detection, 1959
- COUPLED-COLUMN CHROMATOGRAPHY**
- A restricted access medium column for the trace determination of triadimenol and tefronazole in water with large-volume injection coupled-column RPLC with UV detection, 1549
- CROSS CONTAMINATION**
- The minimisation of *aqua regia* cross contamination in PFA and TFM microwave digestion vessels using silver as an indicator, 327
- CROWN ETHER**
- Studies on metal-ion complex formation of crown ether derivatives incorporating a photoionizable spirobenzopyran moiety by electrospray ionization mass spectrometry, 1091
- Ion association reactions in aqueous solutions between non-UV-absorbing crown ether–alkali metal complexes with picrate ion by capillary zone electrophoresis, 1928
- CURVE FITTING**
- Comparison of wavelet transform and Fourier self-deconvolution (FSD) and wavelet FSD for curve fitting, 915
- CYANIDE**
- Fluorimetric flow injection and flow-through sensing systems for cyanide control in waste water, 2100
- CYCLAMATE**
- Determination of cyclamate in low-calorie foods by high-performance liquid chromatography with indirect visible photometry, 217
- CYCLIC VOLTAMMETRY**
- Renewable amperometric immunosensor based on paraffin–graphite–transferrin antiserum biocomposite for transferrin assay, 1595
- Flow injection analysis of hydrogen peroxide on copper-plated screen-printed carbon electrodes, 1633
- Assessment of growth of *Fusarium solani* by cyclic voltammetry and possible bioanalytical applications, 2166
- CYCLODEXTRIN**
- Do matrix-assisted laser desorption/ionization mass spectra reflect solution-phase formation of cyclodextrin inclusion complexes?, 849
- Hydroxypropyl- β -cyclodextrin enhanced fluorimetric method for the determination of melatonin and 5-methoxytryptamine, 1465
- CYSTIC FIBROSIS**
- Point-of-need diagnosis of cystic fibrosis using a potentiometric ion-selective electrode array, 2264
- DATA ANALYSIS**
- A PARAFAC algorithm using penalty diagonalization error (PDE) for three-way data array resolution, 2303
- DECONVOLUTION**
- Deconvolution of a three-component co-eluting peak cluster in gas chromatography-mass spectrometry, 287
- Quantitative resolution of overlapping tailing peaks obtained by diode-array detector high performance liquid chromatography in the absence of pure standards using simple chemical knowledge, 833
- DERIVATIVE SPECTRA**
- Derivative spectrophotometry in the analysis of mixtures of phenols and herbicides, 2335
- DERIVATIZATION**
- Determination of gentamicin after trimethylsilylimidazole and trifluoroacetic anhydride derivatization using gas chromatography and negative ion chemical ionization ion trap mass spectrometry, 1573
- Determination of superabsorbent polyacrylate dust in workplace atmospheres after derivatization with ethanol and using HPLC with pulsed electrochemical detection, 1745
- Study on the fluorescent ‘on-off’ properties of benzofuran compounds bearing an aromatic substituent group and design of fluorescent ‘on-off’ derivatization reagents, 1839
- DERIVATIZED POLYSTYRENE**
- IR chemical sensor for detection of chlorinated anilines in aqueous solutions based on ATR waveguides coated with derivatized polystyrene, 1605
- DETECTION LIMIT**
- Major sensitivity improvements in ion chromatography determinations involving post-column spectrophotometric reaction detectors through elimination of pump noise using a dual wavelength monitoring procedure, 803
- DIAZEPAM**
- Detection of diazepam in horse hair samples by mass spectrometric methods, 1765
- DIESEL**
- Effect of sample geometry on synchronous fluorimetric analysis of petrol, diesel, kerosene and their mixtures at higher concentration, 1383
- DIFFERENTIAL-PULSE VOLTAMMETRY**
- Differential pulse voltammetric indirect determination of aluminium in drinking waters, blood, urine, hair, and medicament samples using L-dopa under alkaline conditions, 1299
- Voltammetric measurements of the interaction of metal complexes with nucleic acids, 1791
- Alloy electrodes with high hydrogen overvoltage for analytical use in voltammetry. Some preliminary results, 2163
- DIFFUSE REFLECTANCE LASER FLASH PHOTOLYSIS**
- A novel optical oxygen sensing system based on triplet-triplet reflectance of fullerene C₆₀-polystyrene film by time-resolved spectroscopy using diffuse reflectance laser flash photolysis, 523
- DIISOCYANATE**
- MALDI-MS and colorimetric analysis of diisocyanate and polyol migrants from model polyurethane adhesives used in food packaging, 115
- DINITROPHENOL**
- A renewable liquid drop sensor for di- or trinitrophenol based on fluorescence quenching of 3,3',5,5'-tetramethylbenzidine dihydrochloride, 877
- DIODE ARRAY DETECTOR**
- Quantitative resolution of overlapping tailing peaks obtained by diode-array detector high performance liquid chromatography in the absence of pure standards using simple chemical knowledge, 833
- Flow injection spectroscopic analysis of model drugs using on-line UV-diode array, FT-infrared and ¹H-nuclear magnetic resonance spectroscopy and time-of-flight mass spectrometry, 927
- DIODE LASER**
- Violet (405 nm) diode laser for laser induced fluorescence detection in capillary electrophoresis, 1049
- DIRECT INSERTION MEMBRANE PROBE**
- Trace level analysis of VOCs and semi-VOCs in aqueous solution using a direct insertion membrane probe and trap and release membrane introduction mass spectrometry, 21
- DNA**
- Ultrasensitive, direct detection of a specific DNA sequence of *Bacillus anthracis* in solution, 9
- Structural analysis of drug-DNA adducts by tandem mass spectrometry, 627
- Interactions of Janus Green B with double stranded DNA and the determination of DNA based on the measurement of enhanced resonance light scattering, 1267
- Bioassay of bile acids using an enzyme-linked DNA aptamer, 1371
- Photoelectrochemistry as a novel strategy for DNA hybridization detection, 1908
- DRIFT CORRECTION**
- A drift correction procedure for ICP-AES systems, 1015
- DRUG**
- Determination of morphine, oripavine and pseudomorphine using capillary electrophoresis with acidic potassium permanganate chemiluminescence detection, 91
- Microdialysis sampling with on-line microbore HPLC for the determination of tirapazamine and its reduced metabolites in rats, 105
- Rapid analysis of illicit drugs by mass spectrometry: Results from seizures in Ireland, 119
- Deconvolution of a three-component co-eluting peak cluster in gas chromatography-mass spectrometry, 287
- Rapid analysis of ecstasy and related phenethylamines in seized tablets by Raman spectroscopy, 541
- Structural analysis of drug-DNA adducts by tandem mass spectrometry, 627
- Direct coupling of microcolumn liquid chromatography with in-tube solid-phase microextraction for the analysis of antidepressant drugs, 807

- Differentiation of *Scutellariae Radix* from *Astragali Radix* by capillary electrophoresis with electrochemical detection, 815
 Flow injection spectroscopic analysis of model drugs using on-line UV-diode array, FT-infrared and ^1H -nuclear magnetic resonance spectroscopy and time-of-flight mass spectrometry, 927
 Potentially of proton nuclear magnetic resonance and multivariate calibration methods for the determination of dermatan sulfate contamination in heparin samples, 933
 Derivation of tertiary amphetamines with 9-fluorenylmethyl chloroformate for liquid chromatography: determination of *N*-methylamphetamine, 1071
 High-performance liquid chromatographic assay of erythromycin from biological matrix using electrochemical or ultraviolet detection, 1077
 Electrophoretic behavior study and determination of some active components in Chinese medicinal preparations by capillary electrophoresis, 1083
 Measurement of β -agonist residues in retinal tissue of food producing animals, 1103
 Salbutamol plastic membrane electrodes based on individual and mixed ion-exchangers of salbutamolium phosphotungstate and phosphomolybdate, 1129
 Flow injection-pulse amperometric detection of ephedrine at a cobalt phthalocyanine modified carbon paste electrode, 1147
 Application of principal component regression to luminescence data for the screening of ciprofloxacin and enrofloxacin in animal tissues, 1155
 Use of partial least-squares regression for multicomponent determinations based on kinetic spectrofluorimetric data. Simultaneous determination of canrenone and spironolactone in urine, 1159
 Fast urinary screening for paracetamol using on-line microwave assisted hydrolysis and spectrophotometric detection, 1179
 Determination of *N,N*-dimethylaminoethyl chloride and the dimethylaziridinium ion at sub-ppm levels in diltiazem hydrochloride by LC-MS with electrospray ionisation, 1255
 Chemiluminescent determination of reserpine and related alkaloids, 1307
 Enhanced chemiluminescent determination of chloramphenicol and related nitro compounds by 'on-line' photochemical reaction, 1313
 Determination of cocaine and heroin vapor pressures using commercial and illicit samples, 1393
 Applications of ELISA, Western blotting and immunoaffinity concentration for survey of ginsenosides in crude drugs of *Panax* species and traditional Chinese herbal medicines, 1425
 Efficient sample pre-concentration of bupivacaine from human plasma by solid-phase extraction on molecularly imprinted polymers, 1515
 Rapid confirmatory assay for the simultaneous detection of ronidazole, metronidazole and dimetridazole in eggs using liquid chromatography-tandem mass spectrometry, 1533
 Trichosanthin induced calcium-dependent generation of reactive oxygen species in human choriocarcinoma cells, 1539
 Aqueous and non-aqueous capillary electrophoresis of polar drugs, 1561
 Clean-up, detection and determination of salbutamol in human urine and serum, 1569
 Determination of gentamicin after trimethylsilylimidazole and trifluoroacetic anhydride derivatization using gas chromatography and negative ion chemical ionization ion trap mass spectrometry, 1573
 Adsorptive stripping voltammetric determination of ketoconazole in pharmaceutical preparations and urine using carbon paste electrodes, 1639
 Continuous free flow electrophoresis for preparative chiral separations of piperoxan using sulfated β -cyclodextrin, 1719
 Terbium-sensitized luminescence determination of levofloxacin in tablets and human urine and serum, 1851
 Novel flow injection methods for drug-receptor interaction studies, based on probing cell metabolism, 1889
 Description and validation of an analytical method for the determination of paromomycin sulfate in medicated animal feeds, 1955
 Modified microelectrodes and multivariate calibration for flow injection amperometric simultaneous determination of ascorbic acid, dopamine, epinephrine and dipyrrone, 2011
 Spectrofluorimetric determination of moxifloxacin in tablets, human urine and serum, 2322
- DYE**
 Simultaneous determination of dihydroxybenzenes, aminophenols and phenylenediamines in hair dyes by high-performance liquid chromatography on hypercross-linked polystyrene, 1249
- γ -CYCLODEXTRIN**
 Micellar electrokinetic chromatography of monohydroxybenzo[*a*]pyrene positional isomers using γ -cyclodextrin, 1555
- EDMAN DEGRADATION**
 Identification of major histocompatibility complex class II-associated peptides derived from freshly prepared rat Langerhans cells using MALDI-PSD and Edman degradation, 569
- ELECTRO-OSMOTIC FLOW**
 Electro-osmotic and pressure-driven flow properties of frits for packed column capillary electrochromatography prepared from functionalised and bare silica packings, 1
- ELECTROCHEMICAL DETECTION**
 Bioavailability studies of oral dosage forms containing levodopa and carbipoda using column-switching chromatography followed by electrochemical detection, 439
 Electrochemical detection of nitrate and nitrite at a copper modified electrode, 737
 Differentiation of *Scutellariae Radix* from *Astragali Radix* by capillary electrophoresis with electrochemical detection, 815
 Determination of saccharides in wastewater from the beverage industry by microdialysis sampling, microbore high performance anion exchange chromatography and integrated pulsed electrochemical detection, 1379
 Determination of 4-nonylphenol and 4-octylphenol in human blood samples by high-performance liquid chromatography with multi-electrode electrochemical coulometric-array detection, 1959
- ELECTROCHEMILUMINESCENCE**
 An electrochemiluminescence-based fibre optic biosensor for choline flow injection analysis, 151
 Development and characterization of a novel electrochemiluminescent reaction involving cadmium, 2065
- ELECTROCHEMISTRY**
 A novel electrochemical microsensor for the determination of NO and its application to the study of the NO donor S-nitrosoglutathione, 163
 Phenol substituent effects on electrogenerated chemiluminescence quenching, 545
 Electrochemical impedance study and sensitive voltammetric determination of Pb(II) at electrochemically activated glassy carbon electrodes, 1139
 Development of an electrochemical ELISA for the screening of 17 β -estradiol and application to bovine serum, 1419
 Mediated electron transfer at conducting polymer ultramicroelectrodes, 1611
 An electrochemical approach to the determination of dinobuton: a study of water samples, 1645
 Electrochemical oxidation at carbon paste electrode of tacrine and 1-hydroxytacrine and differential pulse voltammetric determination of tacrine in pharmaceuticals and human urine, 2016
 A dual electrochemical sensor for nitrite and nitric oxide, 2169
 The enhanced electrogenerated chemiluminescence of Ru(bpy)₃²⁺ by glutathione on a glassy carbon electrode modified with some porphine compounds, 2294
 Study of the electrochemical behavior of mitoxantrone and its determination at a Co-C modified ultramicroelectrode, 2299
- ELECTRODE**
 Renewable pencil electrodes for highly sensitive stripping potentiometric measurements of DNA and RNA, 5
 Laser activated voltammetry: application to the determination of phenol in aqueous solution at a glassy carbon electrode, 531
 Selective determination of thiols: a novel electroanalytical approach, 661
 Electrochemical detection of nitrate and nitrite at a copper modified electrode, 737
 Electrocatalytic oxidation of NO at electrode modified with Nafion-Co^{II}-1,10-phenanthroline film and its application to NO detection, 793
 Simple procedure for the fabrication of silver/silver chloride potentiometric electrodes with micrometre and smaller dimensions: application to scanning electrochemical microscopy, 889
 Determination of trace tin in flow systems at an epoxy-carbon powder-8-hydroxyquinoline composite electrode, 895
 Indirect amperometric detection of underivatized amino acids in microcolumn liquid chromatography with carbon film based ring-disk electrodes, 1041
 Salbutamol plastic membrane electrodes based on individual and mixed ion-exchangers of salbutamolium phosphotungstate and phosphomolybdate, 1129
 A study of the preconcentration and stripping voltammetry of Pb(II) at carbon electrodes, 1135
 Electrochemical impedance study and sensitive voltammetric determination of Pb(II) at electrochemically activated glassy carbon electrodes, 1139
 Flow injection-pulse amperometric detection of ephedrine at a cobalt phthalocyanine modified carbon paste electrode, 1147
 Mediated electron transfer at conducting polymer ultramicroelectrodes, 1611
 Nitric oxide solutions: standardisation by chronoamperometry using a platinum disc microelectrode, 1629
 Flow injection analysis of hydrogen peroxide on copper-plated screen-printed carbon electrodes, 1633
 Determination of styrene and styrene additives using cylindrical microelectrodes in acetone, 2006
 Modified microelectrodes and multivariate calibration for flow injection amperometric simultaneous determination of ascorbic acid, dopamine, epinephrine and dipyrrone, 2011
 Electrochemical oxidation at carbon paste electrode of tacrine and 1-hydroxytacrine and differential pulse voltammetric determination of tacrine in pharmaceuticals and human urine, 2016
 Alloy electrodes with high hydrogen overvoltage for analytical use in voltammetry. Some preliminary results, 2163
 The enhanced electrogenerated chemiluminescence of Ru(bpy)₃²⁺ by glutathione on a glassy carbon electrode modified with some porphine compounds, 2294

- Study of the electrochemical behavior of mitoxantrone and its determination at a Co-C modified ultramicroelectrode, 2299
- ELECTROINACTIVE ION**
Simultaneous amperometric detection of electroinactive anions and cations in ion chromatography, 1799
- ELECTROKINETIC CHROMATOGRAPHY**
Micellar electrokinetic chromatography of monohydroxybenzo[*a*]pyrene positional isomers using γ -cyclodextrin, 1555
- ELECTRON IMPACT**
Splitless large-volume GC-MS injection for the analysis of organophosphorus and organochlorine pesticides in vegetables using a miniaturised ethyl acetate extraction, 1397
- ELECTRONIC NOSE**
On-line determination of non-volatile or low-concentration metabolites in a yeast cultivation using an electronic nose, 1123
- ELECTROPHORESIS**
Use of capillary electrophoresis and indirect detection to quantitate in-capillary enzyme-catalyzed microreactions, 685
- Quantum dot-labeled trichosanthin, 1029
- Electrophoretic behavior study and determination of some active components in Chinese medicinal preparations by capillary electrophoresis, 1083
- Aqueous and non-aqueous capillary electrophoresis of polar drugs, 1561
- ELECTROSPRAY**
Selenium speciation in enriched and natural samples by HPLC-ICP-MS and HPLC-ESI-MS with perfluorinated carboxylic acid ion-pairing agents, 71
- Electrospray mass spectrometric determination of 1-nitropyrene and non-substituted polycyclic aromatic hydrocarbons using tropylium cation as a post-column HPLC reagent, 417
- Binding of selected carbohydrates to apo-concanavalin A studied by electrospray ionization mass spectrometry, 583
- Characterization of ginseng saponins using electrospray mass spectrometry and collision-induced dissociation experiments of metal-attachment ions, 591
- Nano-electrospray and microbore liquid chromatography-ion trap mass spectrometry studies of copper complexation with MHC restricted peptides, 599
- HPLC-electrospray mass spectrometry for the analysis of temoporfin-poly(ethylene glycol) conjugates, 605
- Electrospray mass spectrometry and collision-induced fragmentation of 2-aminobenzamide-labelled neutral N-linked glycans, 609
- Preparation of single-stranded PCR products for electrospray ionization mass spectrometry using the DNA repair enzyme lambda exonuclease, 619
- Determination of mercapturic acids in urine by solid-phase extraction followed by liquid chromatography-electrospray ionization mass spectrometry, 715
- Determination of haloacetic acids in water by liquid chromatography-electrospray ionization-mass spectrometry using volatile ion-pairing reagents, 1097
- Determination of *N,N*-dimethylaminoethyl chloride and the dimethylaziridinium ion at sub-ppm levels in diltiazem hydrochloride by LC-MS with electrospray ionisation, 1255
- Electrospray and APCI analysis of polyhydroxalkaloids using positive and negative collision induced dissociation experiments in a quadrupole ion trap, 1409
- Optimization strategy for liquid chromatography-electrospray ionization mass spectrometry methods, 1970
- ELECTROSPRAY IONIZATION**
Capillary electrophoresis as a practical tool in the study of novel rigid amino alcohols derived from (+)-camphor for catalytic enantioselective addition of organozincs to aldehydes, 185
- Studies on metal-ion complex formation of crown ether derivatives incorporating a photoionizable spirobenzopyran moiety by electrospray ionization mass spectrometry, 1091
- ELECTROSPRAY MASS SPECTROMETRY**
Automated in-tube solid phase microextraction coupled with HPLC-ES-MS for the determination of catechins and caffeine in tea, 2216
- ELECTROSTATIC ION CHROMATOGRAPHY**
Modulation of the separation selectivity of inorganic anions in electrostatic ion chromatography using acidic eluents, 241
- ELECTROTHERMAL ATOMIC ABSORPTION SPECTROMETRY**
Analytical atomic spectrometry going into the next millennium: photons or ions, atoms or molecules?, 35
- The measurement of silver in road salt by electrothermal atomic absorption spectrometry, 123
- Determination of arsenic in biological fluids by electrothermal atomic absorption spectrometry, 313
- Size-elemental characterization of suspended particle matter by split-flow thin cell fractionation and slurry analysis-electrothermal atomic absorption spectrometry, 1335
- Determination of lead in fish samples by slurry sampling electrothermal atomic absorption spectrometry, 1491
- Comparative study of electrothermal atomic absorption spectrometric methods for the determination of silver in used lubricating oils, 1673
- Single vessel procedure for acid-vapour partial digestion in a focused microwave: Fe and Co determination in biological samples by ETAAS, 1861
- Speciation of Cu, Fe and Mn in beer using ion exchange separation and size-exclusion chromatography in combination with electrothermal atomic absorption spectrometry, 1933
- Determination of hexavalent chromium in lime-treated sewage sludge by anion-exchange fast protein liquid chromatography with electrothermal atomic absorption spectrometry detection, 1938
- Determination of arsenic in sediment and soil slurries by electrothermal atomic absorption spectrometry using W-Rh permanent modifier, 2079
- Optimisation of tin determination in *aqua regia*-HF extracts from sediments by electrothermal atomic absorption spectrometry using experimental design, 2084
- ELECTROTHERMAL VAPORIZATION**
Direct analysis of silicon carbide by fluorination assisted electrothermal vaporization inductively coupled plasma atomic emission spectrometry using a slurry sampling technique, 2089
- ELISA**
Development of an electrochemical ELISA for the screening of 17 β -estradiol and application to bovine serum, 1419
- ENANTIOMERS**
Enantioselective supercritical fluid chromatography using Ristocetin A chiral stationary phases, 1037
- Enantioselective uptake of amino acid with overoxidized polypyrrole colloid templated with L-lactate, 2249
- ENANTIOSELECTIVE ADDITION**
Capillary electrophoresis as a practical tool in the study of novel rigid amino alcohols derived from (+)-camphor for catalytic enantioselective addition of organozincs to aldehydes, 185
- ENHANCED RESONANCE LIGHT SCATTERING**
Interactions of Janus Green B with double stranded DNA and the determination of DNA based on the measurement of enhanced resonance light scattering, 1267
- ENVIRONMENTAL**
The measurement of silver in road salt by electrothermal atomic absorption spectrometry, 123
- Collaborative trial in sampling for the spatial delineation of contamination and the estimation of uncertainty, 139
- Trace element determination of single fluid inclusions by laser ablation ICP-MS: applications for halites from sedimentary basins, 205
- Solid phase microextraction (SPME): a new procedure for the control of butyl- and phenyltin pollution in the environment by GC-FPD, 263
- Separation and enrichment of palladium and gold in biological and environmental samples, adapted to the determination by total reflection X-ray fluorescence, 397
- Storage of natural water samples for total and reactive mercury analysis in PET bottles, 549
- Solid-phase extraction and spectrophotometric determination of hydrogen sulfide in air and water utilizing ethylene blue formation, 1185
- Study of the fluorescence characteristics of norfloxacin in reversed micelles and applications in analysis, 1477
- Monofluorinated polycyclic aromatic hydrocarbons: characteristics and intended use in environmental analysis, 1699
- Assessment of X-ray photoelectron spectroscopy for analysis of particulate pollutants in urban air, 1703
- A quantitative extraction method for the determination of trace amounts of both butyl- and phenyltin compounds in sediments by gas chromatography-inductively coupled plasma mass spectrometry, 1757
- Determination of arsenic in sediment and soil slurries by electrothermal atomic absorption spectrometry using W-Rh permanent modifier, 2079
- Metal distribution patterns in the mussel *Mytilus edulis* cytosols using size-exclusion chromatography and double focusing ICP-MS detection, 2223
- ENZYMIC HYDROLYSIS**
On-line monitoring of starch enzymatic hydrolysis by near-infrared spectroscopy, 749
- Enzymatic hydrolysis of conjugated steroid metabolites: search for optimum conditions using response surface methodology, 2255
- ENZYME**
Aromatic aldehydes as fluorogenic indicators for human aldehyde dehydrogenases and oxidases: substrate and isozyme specificity, 511
- Preparation of single-stranded PCR products for electrospray ionization mass spectrometry using the DNA repair enzyme lambda exonuclease, 619
- Temperature modulated solubility and activity alteration for oligo-(*N*-isopropylacrylamide)-iron tetrasulfonatophthalocyanine conjugates as a new mimetic peroxidase, 719
- Dissociation of ribulose-1,5-bisphosphate carboxylase/oxygenase (Rubisco) observed by capillary electrophoresis, 1087
- Enzymatic determination of choline in milk using a FIA system with potentiometric detection, 1281
- Peroxidase enhanced lanthanide luminescence—a new technique for the evaluation of bioassays, 1537
- An improved assay of 3-hydroxy-3-methylglutaryl-CoA reductase activity in Reuber H35 hepatoma cells without microsomes isolation, 1583
- Enzymatic activity measurement of phospholipid hydroperoxide glutathione peroxidase by capillary electrophoresis, 1924

ENZYME-CATALYSED MICROREACTIONS

Use of capillary electrophoresis and indirect detection to quantitate in-capillary enzyme-catalyzed microreactions, 685

ENZYME ELECTRODE

Reagentless enzyme electrode based on phenothiazine mediation of horseradish peroxidase for subnanomolar hydrogen peroxide determination, 79

ENZYME FLUORESCENCE IMMUNOASSAY

A novel mimetic enzymatic fluorescence immunoassay for hepatitis B surface antigen by using a thermal phase separating polymer, 2260

ENZYME IMMUNOASSAY

An enzyme-linked molecularly imprinted sorbent assay, 13

ENZYME-LINKED IMMUNOSORBENT ASSAY

Production of monoclonal antibody against a major purgative component, sennoside A, its characterization and ELISA, 1109

Applications of ELISA, Western blotting and immunoaffinity concentration for survey of ginsenosides in crude drugs of *Panax* species and traditional Chinese herbal medicines, 1425

ENZYME LINKED MOLECULARLY IMPRINTED SORBENT ASSAY

An enzyme-linked molecularly imprinted sorbent assay, 13

ENZYME REACTOR

In-situ immobilisation of glucose oxidase on a novel microporous silica support, 237

ESSENTIAL OILS

An approach to the static-dynamic subcritical water extraction of laurel essential oil: comparison with conventional techniques, 481

ESTROGENS

Studies on neurosteroids. Part XIII. Characterization of catechol estrogens in rat brains using liquid chromatography-mass spectrometry-mass spectrometry, 811

Simultaneous quantitative determination of norgestrel and progesterone in human serum by high-performance liquid chromatography-tandem mass spectrometry with atmospheric pressure chemical ionization, 2201

ETHACRYNIC ACID

A novel ethacrynic acid sensor based on a lanthanide porphyrin complex in a PVC matrix, 867

ETHANOL

Non-invasive determination of ethanol, propylene glycol and water in a multi-component pharmaceutical oral liquid by direct measurement through amber plastic bottles using Fourier transform near-infrared spectroscopy, 2054

High accuracy isotope dilution analysis for the determination of ethanol using gas chromatography-combustion-isotope ratio mass spectrometry, 2189

EUGENOL

Use of supported liquid membranes incorporated in a flow system for the direct determination of eugenol in spice samples, 1805

EXTRACTION

Extractive fluorimetric determination of malathion residues in water samples, 323

Determination of trace zirconium and hafnium in basaltic rocks by inductively coupled plasma atomic emission spectrometry after chemical separation: an evaluation of two methods based on extraction chromatography, 453

MultiSimplex optimisation of purge-and-trap extraction of volatile organic compounds in soil samples, 477

Extracting syringe—connecting sample preparation and gas chromatography, 673

Homogeneous liquid-liquid extraction followed by X-ray fluorescence spectrometry of a microdroplet on filter-paper for the simultaneous determination of small amounts of metals, 797

Comparison between sequential extraction procedures and single extractions for metal partitioning in sewage sludge samples, 1353

FAST FOURIER TRANSFORMATION

Discrimination and quantification of flammable gases with a SnO₂ sniffing sensor, 517

FAST PROTEIN LIQUID CHROMATOGRAPHY

Determination of hexavalent chromium in lime-treated sewage sludge by anion-exchange fast protein liquid chromatography with electrothermal atomic absorption spectrometry detection, 1938

FEEDSTUFF

Determination of thiamine and riboflavin in pet foods and animal feedingstuffs, 353

Description and validation of an analytical method for the determination of paromomycin sulfate in medicated animal feeds, 1955

FISH

Determination of lead in fish samples by slurry sampling electrothermal atomic absorption spectrometry, 1491

FITNESS-FOR-PURPOSE

Recent trends in inter-laboratory precision at ppb and sub-ppb concentrations in relation to fitness for purpose criteria in proficiency testing, 385

FLAME ATOMIC ABSORPTION SPECTROMETRY

On-line preconcentration and separation of platinum using thiourea modified silica gel with microwave assisted desorption for FAAS determination, 1205

Determination of metals in lubricating oils by flame atomic absorption

spectrometry using a single-bore high-pressure pneumatic nebulizer, 2344

FLAME ATOMIZATION

Thiosalicylic acid-immobilized Amberlite XAD-2: metal sorption behaviour and applications in estimation of metal ions by flame atomic absorption spectrometry, 2350

FLAME IONISATION DETECTION

The authentication of olive oil on the basis of hydrocarbon concentration and composition, 97

FLOW ANALYSIS

Precipitation titrations using an automatic titrator based on a multicommutated unsegmented flow system, 333

Multisyringe flow system: determination of sulfur dioxide in wines, 1501

Use of supported liquid membranes incorporated in a flow system for the direct determination of eugenol in spice samples, 1805

Pulsed flow chemistry: a new approach to solution handling for flow analysis coupled with chemiluminescence detection, 1869

A robust multisyringe system for process flow analysis Part II. A multi-commutated injection system applied to the photometric determination of free acidity and iron(III) in metallurgical solutions, 2364

FLOW INJECTION

Determination of cobalt and iron in estuarine and coastal waters using flow injection with chemiluminescence detection, 51

Synthesis of silica gel immobilized thiourea and its application to the on-line preconcentration and separation of silver, gold and palladium, 147

An electrochemiluminescence-based fibre optic biosensor for choline flow injection analysis, 151

On-line monitoring of chromium(III) using a fast micromachined mixer/reactor and chemiluminescence detection, 677

Flow injection chemiluminescence determination of *N*-tetrahydrobenzothiazolyl imines, 753

Anomalous behaviour of the quartz crystal microbalance in the presence of electrolytes, 785

Determination of trace tin in flow systems at an epoxy-carbon powder-8-hydroxyquinaline composite electrode, 895

Application of artificial neural networks coupled with an orthogonal design and optimization algorithms to multifactor optimization of a new FIA system for the determination of uranium(VI) in ore samples, 921

Flow injection spectroscopic analysis of model drugs using on-line UV-diode array, FT-infrared and ¹H-nuclear magnetic resonance spectroscopy and time-of-flight mass spectrometry, 927

Lab-on-valve: universal microflow analyzer based on sequential and bead injection, 1053

Flow injection-pulse amperometric detection of ephedrine at a cobalt phthalocyanine modified carbon paste electrode, 1147

Flow injection-liquid chromatography-cold vapour atomic absorption spectrometry for rapid determination of methyl and inorganic mercury, 1193

On-line preconcentration and separation of platinum using thiourea modified silica gel with microwave assisted desorption for FAAS determination, 1205

A novel flow injection procedure for determination of phosphate in industrial raw phosphoric acid, 1211

Enzymatic determination of choline in milk using a FIA system with potentiometric detection, 1281

Group speciation of metal dithiocarbamates by sorption on C₆₀ fullerene, 1495

Flow injection analysis of hydrogen peroxide on copper-plated screen-printed carbon electrodes, 1633

Dual analyte flow injection fluorescence immunoassays using thiophilic gel reactors and synchronous scanning detection, 1707

Flow injection-FTIR determination of dithiocarbamate pesticides, 1829

Determination of sulfide in waters by flow-injection solid phase

spectrophotometry, 1835

Novel flow injection methods for drug-receptor interaction studies, based on probing cell metabolism, 1889

The quantification of potassium using a quartz crystal microbalance, 1983

Modified microelectrodes and multivariate calibration for flow injection amperometric simultaneous determination of ascorbic acid, dopamine, epinephrine and dipyrone, 2011

Fluorimetric flow injection and flow-through sensing systems for cyanide control in waste water, 2100

A dual electrochemical sensor for nitrite and nitric oxide, 2169

Flow injection analysis of fluoride: optimization of experimental conditions and non-linear calibration using artificial neural networks, 2376

FLUORESCENCE

A capillary electrophoresis microchip for the analysis of photographic developer solutions using indirect fluorescence detection, 133

Fluorescent optode membrane based on organogel for humidity sensing, 301

Determination of proteins in serum by fluorescence quenching of Rose Bengal using the stopped-flow mixing technique, 507

Surface plasmon enhanced fluorescence measurement on flat and constructed gold surfaces, 535

- Quantum dot-labeled trichosanthin, 1029
 Single-molecule detection using confocal fluorescence detection:
 Assessment of optical probe volumes, 1033
 Development of water-soluble fluorogenic reagents having a
 2,1,3-benzoxadiazole structure and their application to the
 determination of peptides, 1115
 Ratiometric oxygen sensing: detection of dual-emission ratio through a
 single emission filter, 1175
 Development of an iodine sensor based on fluorescence energy transfer,
 1441
 Study of the fluorescence characteristics of norfloxacin in reversed
 micelles and application in analysis, 1477
 The high-sensitivity determination of protein concentrations by the
 enhancement of Rayleigh light scattering of Arsenazo-DBN, 1483
 Visual fluorimetry of trace aluminium by specific immobilization with
 α,ω' -dihydroxyazobenzene on an octadecylsilanized silica thin layer,
 1667
 Dual analyte flow injection fluorescence immunoassays using thiophilic
 gel reactors and synchronous scanning detection, 1707
 Study on the fluorescent 'on-off' properties of benzofuran compounds
 bearing an aromatic substituent group and design of fluorescent
 'on-off' derivatization reagents, 1839
 Quantification of glycoalkaloids in tomato plants by time-resolved
 fluorescence using a europium chelator entrapped in liposomes, 1847
 A fluorescent-labeled oligopeptide for monitoring PKA-mediated
 phosphorylation, 1905
 A rapid method for the determination of lasalocid in animal tissues and
 eggs by high performance liquid chromatography with fluorescence
 detection and confirmation by LC-MS-MS, 2196
 Rejection of capillary wall background light in an on-column confocal
 fluorescence detector, 2241
- FLUORESCENCE QUENCHING**
- A renewable liquid drop sensor for di- or trinitrophenol based on
 fluorescence quenching of 3,3',5,5'-tetramethylbenzidine
 dihydrochloride, 877
- FLUORESCENCE SPECTROMETRY**
- Ultrasensitive, direct detection of a specific DNA sequence of *Bacillus*
 anthracis in solution, 9
- The application of fluorescence polarisation for the enhanced detection of
 green fluorescent protein (GFP) in the presence of cellular
 auto-fluorescence and other green fluorescent compounds, 499
- FLUORIDE**
- Flow injection analysis of fluoride: optimization of experimental
 conditions and non-linear calibration using artificial neural networks,
 2376
- FLUORIMETRY**
- Effect of sample geometry on synchronous fluorimetric analysis of
 petrol, diesel, kerosene and their mixtures at higher concentration,
 1383
- Hydroxypropyl- β -cyclodextrin enhanced fluorimetric method for the
 determination of melatonin and 5-methoxytryptamine, 1465
- Fluorimetric determination of iron using
 5-(4-methoxyphenylazo)-8-(4-toluenesulfonamido)quinoline, 1661
- Fluorimetric flow injection and flow-through sensing systems for cyanide
 control in waste water, 2100
- Sensitive fluorimetric determination of formaldehyde by the
 co-quenching effect of formaldehyde and sulfite on the fluorescence of
 tetra-substituted amino aluminium phthalocyanine, 2330
- Sensitive determination of diquat by a kinetic method using the
 stopped-flow mixing technique, 2372
- FLUOROBORATE**
- Bismetalloporphyrin-based ISE sensitive to fluoroborate, 2285
- FLUOROPOLYMER**
- Optical oxygen sensing based on the luminescence change of
 metalloporphyrins immobilized in styrene-pentafluorostyrene
 copolymer film, 871
- FOOD**
- Selenium speciation in enriched and natural samples by HPLC-ICP-MS
 and HPLC-ESI-MS with perfluorinated carboxylic acid ion-pairing
 agents, 71
- MALDI-MS and colorimetric analysis of diisocyanate and polyol
 migrants from model polyurethane adhesives used in food packaging,
 115
- Determination of cyclamate in low-calorie foods by high-performance
 liquid chromatography with indirect visible photometry, 217
- Development of chiral HPLC for selenoamino acids with ICP-MS
 detection: application to selenium nutritional supplements, 281
- A microtitre plate assay for the detection of antibiotics in porcine urine,
 395
- Splitless large-volume GC-MS injection for the analysis of
 organophosphorus and organochlorine pesticides in vegetables using a
 miniaturised ethyl acetate extraction, 1397
- Biosensor assay of sulfadiazine and sulfamethazine residues in pork,
 1771
- Quantification of glycoalkaloids in tomato plants by time-resolved
 fluorescence using a europium chelator entrapped in liposomes, 1847
- Tetraethylammonium tetrafluoroborate: a novel electrolyte with a unique
 role in the capillary electrophoretic separation of polyphenols found in
 grape seed extracts, 1919
- Determination of triazine herbicides in foods with liquid chromatography
 mass spectrometry, 1966
- Improved measurement of iodine in food samples using inductively
 coupled plasma isotope dilution mass spectrometry, 1977
- Determination of titanium dioxide in foods using inductively coupled
 plasma optical emission spectrometry, 2339
- FORMALDEHYDE**
- Sensitive fluorimetric determination of formaldehyde by the
 co-quenching effect of formaldehyde and sulfite on the fluorescence of
 tetra-substituted amino aluminium phthalocyanine, 2330
- FOURIER SELF-DECONVOLUTION**
- Comparison of wavelet transform and Fourier self-deconvolution (FSD)
 and wavelet FSD for curve fitting, 915
- FOURIER TRANSFORM**
- Evaluation of analytical instrumentation. Part XIV. Instrumentation for
 Fourier transform infrared spectrometry, 375
- Comparative study of capillary zone electrophoresis and micellar
 electrokinetic capillary chromatography for the separation of
 naphthalenedisulfonate isomers, 2236
- FOURIER TRANSFORM INFRARED SPECTROSCOPY**
- Flow injection spectroscopic analysis of model drugs using on-line
 UV-diode array, FT-infrared and ^1H -nuclear magnetic resonance
 spectroscopy and time-of-flight mass spectrometry, 927
- Flow injection-FTIR determination of dithiocarbamate pesticides, 1829
- FOURIER TRANSFORM NEAR-INFRARED SPECTROSCOPY**
- Non-invasive determination of ethanol, propylene glycol and water in a
 multi-component pharmaceutical oral liquid by direct measurement
 through amber plastic bottles using Fourier transform near-infrared
 spectroscopy, 2054
- FOURIER TRANSFORM RAMAN**
- Calcium carbonate phase analysis using XRD and FT-Raman
 spectroscopy, 251
- FREE ACIDITY**
- A robust multisyringe system for process flow analysis Part II. A
 multi-commuted injection system applied to the photometric
 determination of free acidity and iron(III) in metallurgical solutions,
 2364
- FRUIT**
- Sample preparation in the determination of phenolic compounds in fruits,
 989
- FUBERIDAZOLE**
- Trace determination of carbendazim, fuberidazole and thiabendazole in
 water by application of multivariate calibration to cross-sections of
 three-dimensional excitation-emission matrix fluorescence, 1167
- FUNGICIDE**
- Determination of morpholine fungicides using the tris(2,2'-bipyridine)
 ruthenium(II) chemiluminescence reaction, 765
- Group speciation of metal dithiocarbamates by sorption on C_{60} fullerene,
 1495

- Determination of trace zirconium and hafnium in basaltic rocks by inductively coupled plasma atomic emission spectrometry after chemical separation: an evaluation of two methods based on extraction chromatography, 453
- GINSENG**
- Characterization of ginseng saponins using electrospray mass spectrometry and collision-induced dissociation experiments of metal-attachment ions, 591
- GINSENOIDES**
- Characterization of ginseng saponins using electrospray mass spectrometry and collision-induced dissociation experiments of metal-attachment ions, 591
- Applications of ELISA, Western blotting and immunoaffinity concentration for survey of ginsenosides in crude drugs of *Panax* species and traditional Chinese herbal medicines, 1425
- GLUCOSE**
- A glucose biosensor with enzyme-entrapped sol-gel and an oxygen-sensitive optode membrane, 157
- In-situ immobilisation of glucose oxidase on a novel microporous silica support, 237
- One-step electropolymeric co-immobilization of glucose oxidase and heparin for amperometric biosensing of glucose, 1431
- The development of an improved glucose biosensor using recombinant carbohydrate oxidase from *Microdochium nivale*, 1587
- Phasor transform to extract glucose and ascorbic acid data in an amperometric sensor, 1987
- GLUCOSE OXIDASE**
- In-situ immobilisation of glucose oxidase on a novel microporous silica support, 237
- GLYCANS**
- Electrospray mass spectrometry and collision-induced fragmentation of 2-aminobenzamide-labelled neutral N-linked glycans, 609
- GLYCOALKALOIDS**
- Quantification of glycoalkaloids in tomato plants by time-resolved fluorescence using a europium chelator entrapped in liposomes, 1847
- GLYCOSIDE**
- A new method for the selective quantitation of cyanogenic glycosides by membrane introduction mass spectrometry, 1529
- GOLD**
- Synthesis of silica gel immobilized thiourea and its application to the on-line preconcentration and separation of silver, gold and palladium, 147
- Separation and enrichment of palladium and gold in biological and environmental samples, adapted to the determination by total reflection X-ray fluorescence, 397
- Surface plasmon enhanced fluorescence measurement on flat and constructed gold surfaces, 535
- GRAPHITE**
- Determination of impurity elements in high purity graphite by inductively coupled plasma atomic emission spectrometry after microwave decomposition, 1189
- HAFNIUM**
- Determination of trace zirconium and hafnium in basaltic rocks by inductively coupled plasma atomic emission spectrometry after chemical separation: an evaluation of two methods based on extraction chromatography, 453
- HAIR**
- Determination of trace selenium in human plasma and hair with ternary inclusion compound-fluorescent spectrophotometry, 2326
- HALOACETIC ACIDS**
- Determination of haloacetic acids in water by liquid chromatography-electrospray ionization-mass spectrometry using volatile ion-pairing reagents, 1097
- HEAVY METALS**
- Alloy electrodes with high hydrogen overvoltage for analytical use in voltammetry. Some preliminary results, 2163
- Metal distribution patterns in the mussel *Mytilus edulis* cytosols using size-exclusion chromatography and double focusing ICP-MS detection, 2223
- HEPARIN**
- Potentiality of proton nuclear magnetic resonance and multivariate calibration methods for the determination of dermatan sulfate contamination in heparin samples, 933
- HEPATITIS B**
- A novel mimetic enzymatic fluorescence immunoassay for hepatitis B surface antigen by using a thermal phase separating polymer, 2260
- HERBICIDE**
- An enzyme-linked molecularly imprinted sorbent assay, 13
- Competitive assay of 2,4-dichlorophenoxyacetic acid using a polymer imprinted with an electrochemically active tracer closely related to the analyte, 665
- Derivative spectrophotometry in the analysis of mixtures of phenols and herbicides, 2335
- HEXYACYANOFERRATE**
- Coprecipitating ammonium-iron(III)-hexacyanoferrate(II) from aqueous dispersion with albumin and trichloroacetic acid, 855
- HIGH-PERFORMANCE LIQUID CHROMATOGRAPHY**
- Selenium speciation in enriched and natural samples by HPLC-ICP-MS and HPLC-ESI-MS with perfluorinated carboxylic acid ion-pairing agents, 71
- Microdialysis sampling with on-line microbore HPLC for the determination of tirapazamine and its reduced metabolites in rats, 105
- Determination of cyclamate in low-calorie foods by high-performance liquid chromatography with indirect visible photometry, 217
- High-performance liquid chromatography and inductively coupled plasma mass spectrometry (HPLC-ICP-MS) for the analysis of xenobiotic metabolites in rat urine: application to the metabolites of 4-bromoniline, 235
- Development of chiral HPLC for selenoamino acids with ICP-MS detection: application to selenium nutritional supplements, 281
- Determination of thiamine and riboflavin in pet foods and animal feedingstuffs, 353
- Comparison of biota sample pretreatments for arsenic speciation with coupled HPLC-HG-ICP-MS, 401
- Electrospray mass spectrometric determination of 1-nitropyrene and non-substituted polycyclic aromatic hydrocarbons using tropylium cation as a post-column HPLC reagent, 417
- HPLC determination of catechins and caffeine in tea. Differentiation of green, black and instant teas, 421
- Determination of carbonyl compounds in waters using triazine-based hydrazine reagents and liquid chromatography, 433
- HPLC-electrospray mass spectrometry for the analysis of temoporfin-poly(ethylene glycol) conjugates, 605
- Quantitative resolution of overlapping tailing peaks obtained by diode-array detector high performance liquid chromatography in the absence of pure standards using simple chemical knowledge, 833
- Studies on the speciation of inorganic and organic antimony compounds in airborne particulate matter by HPLC-ICP-MS, 1025
- A remote flow cell for UV absorbance detection with capillary HPLC based on a single strand fiber optic, 1061
- High-performance liquid chromatographic assay of erythromycin from biological matrix using electrochemical or ultraviolet detection, 1077
- Development of water-soluble fluorogenic reagents having a 2,1,3-benzodiazepine structure and their application to the determination of peptides, 1115
- Flow injection-liquid chromatography-cold vapour atomic absorption spectrometry for rapid determination of methyl and inorganic mercury, 1193
- Simultaneous determination of dihydroxybenzenes, aminophenols and phenylenediamines in hair dyes by high-performance liquid chromatography on hypercross-linked polystyrene, 1249

- Development of a new approach for total isocyanate determination using the reagent 9-anthracylmethyl 1-piperazinecarboxylate, 1691
- Validation and robustness testing of a HPLC method for the determination of avermectins and moxidectin in animal liver samples using an alumina column clean-up, 1741
- Determination of superabsorbent polyacrylate dust in workplace atmospheres after derivatization with ethanol and using HPLC with pulsed electrochemical detection, 1745
- Description and validation of an analytical method for the determination of paromomycin sulfate in medicated animal feeds, 1955
- Determination of 4-nonylphenol and 4-octylphenol in human blood samples by high-performance liquid chromatography with multi-electrode electrochemical coulometric-array detection, 1959
- Binding patterns of co-existing aluminium and iron to human serum transferrin studied by HPLC-high resolution ICP-MS, 1962
- Ion chromatographic analysis of hydronium ion using ODS modified with dodecylsulfate as the stationary phase, 2160
- A rapid method for the determination of lasalocid in animal tissues and eggs by high performance liquid chromatography with fluorescence detection and confirmation by LC-MS-MS, 2196
- Simultaneous quantitative determination of norgestrel and progesterone in human serum by high-performance liquid chromatography-tandem mass spectrometry with atmospheric pressure chemical ionization, 2201
- Automated in-tube solid phase microextraction coupled with HPLC-ES-MS for the determination of catechins and caffeine in tea, 2216
- HIGHLIGHT**
- Molecular spectrometry—milestones for the millennium, 45
- HORMONE**
- Determination of estrone and 17 β -estradiol in human hair by gas chromatography-mass spectrometry, 711
- HORSE**
- Detection of diazepam in horse hair samples by mass spectrometric methods, 1765
- HORSERADISH PEROXIDASE**
- Temperature modulated solubility and activity alteration for oligo-(N-isopropylacrylamide)-iron tetrasulfonatophthalocyanine conjugates as a new mimetic peroxidase, 719
- HUMIDITY**
- Fluorescent optode membrane based on organogel for humidity sensing, 301
- HYDRIDE GENERATION**
- Feasibility study of ion-chromatography microwave assisted on-line species conversion hydride generation atomic absorption spectrometry for selenium speciation analysis of biological material, 273
- Comparison of biota sample pretreatments for arsenic speciation with coupled HPLC-HG-ICP-MS, 401
- Use of perchloric acid as a reaction medium for speciation of arsenic by hydride generation-atomic absorption spectrometry, 949
- Application of sample pre-oxidation of arsenite in human urine prior to speciation via on-line photo-oxidation with membrane hydride generation and ICP-MS detection, 1215
- HYDROCARBON**
- Long-path FTIR spectroscopic studies of air pollutants in the Danube refinery plant, 1655
- HYDROCYANIC ACID**
- Specific spectrophotometric determination of hydrocyanic acid in the environment, 939
- HYDROGEN PEROXIDE**
- Reagentless enzyme electrode based on phenothiazine mediation of horseradish peroxidase for subnanomolar hydrogen peroxide determination, 79
- Amperometric hydrogen peroxide biosensor based on immobilization of peroxidase in chitosan matrix crosslinked with glutaraldehyde, 1591
- Flow injection analysis of hydrogen peroxide on copper-plated screen-printed carbon electrodes, 1633
- HYDROGEN SULFIDE**
- Determination of trace elemental sulfur and hydrogen sulfide in petroleum and its distillates by preliminary extraction with voltammetric detection, 903
- HYDROXIDE IONS**
- Design of a simple optical sensor for the detection of concentrated hydroxide ions in an unusual pH range, 1783
- HYPHENATED TECHNIQUE**
- Bio-inorganic speciation analysis by hyphenated techniques, 963
- IMMUNOAFFINITY**
- Applications of ELISA, Western blotting and immunoaffinity concentration for survey of ginsenosides in crude drugs of *Panax* species and traditional Chinese herbal medicines, 1425
- IMMUNOASSAY**
- A molecularly imprinted polymer for 17 α -ethynodiol evaluated by immunoassay, 1415
- Dual analyte flow injection fluorescence immunoassays using thiophilic gel reactors and synchronous scanning detection, 1707
- IMMUNOSENSOR**
- Fluorescence IgG immunosensor based on a micro flow cell containing controlled pore glass as immobilisation support, 1387
- Renewable amperometric immunosensor based on paraffin-graphite-transferrin antiserum biocomposite for transferrin assay, 1595
- Disposable, low cost, silver-coated, piezoelectric quartz crystal biosensor and electrode protection, 2268
- IMMUNOSORBENT**
- Evaluation of anti-pyrene and anti-fluorene immunosorbent clean-up for PAHs from sludge and sediment reference materials followed by liquid chromatography and diode array detection, 1273
- IMPEDANCE ANALYSIS**
- Anomalous behaviour of the quartz crystal microbalance in the presence of electrolytes, 785
- IMPUITY ANALYSIS**
- Determination of impurity elements in high purity graphite by inductively coupled plasma atomic emission spectrometry after microwave decomposition, 1189
- INCLUSION COMPLEXES**
- Do matrix-assisted laser desorption/ionization mass spectra reflect solution-phase formation of cyclodextrin inclusion complexes?, 849
- INDOLE**
- Hydroxypropyl- β -cyclodextrin enhanced fluorimetric method for the determination of melatonin and 5-methoxytryptamine, 1465
- Chemiluminescence of indole compounds based on oxidation with singlet oxygen generated chemically by the sodium molybdate-hydrogen peroxide system, 2075
- INDUCTIVELY COUPLED PLASMA**
- High-performance liquid chromatography and inductively coupled plasma mass spectrometry (HPLC-ICP-MS) for the analysis of xenobiotic metabolites in rat urine: application to the metabolites of 4-bromoaniline, 235
- Determination of trace zirconium and hafnium in basaltic rocks by inductively coupled plasma atomic emission spectrometry after chemical separation: an evaluation of two methods based on extraction chromatography, 453
- A drift correction procedure for ICP-AES systems, 1015
- Studies on the speciation of inorganic and organic antimony compounds in airborne particulate matter by HPLC-ICP-MS, 1025
- Determination of impurity elements in high purity graphite by inductively coupled plasma atomic emission spectrometry after microwave decomposition, 1189
- Application of sample pre-oxidation of arsenite in human urine prior to speciation via on-line photo-oxidation with membrane hydride generation and ICP-MS detection, 1215
- A quantitative extraction method for the determination of trace amounts of both butyl- and phenyltin compounds in sediments by gas chromatography-inductively coupled plasma mass spectrometry, 1757
- Multi-element analysis by inductively coupled plasma optical emission spectrometry of airborne particulate matter collected with a low-pressure cascade impactor, 1855
- Improved measurement of iodine in food samples using inductively coupled plasma isotope dilution mass spectrometry, 1977
- INDUCTIVELY COUPLED PLASMA ATOMIC EMISSION SPECTROMETRY**
- Analytical atomic spectrometry going into the next millennium: photons or ions, atoms or molecules?, 35
- Direct analysis of silicon carbide by fluorination assisted electrothermal vaporization inductively coupled plasma atomic emission spectrometry using a slurry sampling technique, 2089
- Determination of titanium dioxide in foods using inductively coupled plasma optical emission spectrometry, 2339
- INDUCTIVELY COUPLED PLASMA MASS SPECTROMETRY**
- Analytical atomic spectrometry going into the next millennium: photons or ions, atoms or molecules?, 35
- Selenium speciation in enriched and natural samples by HPLC-ICP-MS and HPLC-ESI-MS with perfluorinated carboxylic acid ion-pairing agents, 71
- Trace element determination of single fluid inclusions by laser ablation ICP-MS: applications for halites from sedimentary basins, 205
- High-performance liquid chromatography and inductively coupled plasma mass spectrometry (HPLC-ICP-MS) for the analysis of xenobiotic metabolites in rat urine: application to the metabolites of 4-bromoaniline, 235
- Development of chiral HPLC for selenoamino acids with ICP-MS detection: application to selenium nutritional supplements, 281
- Comparison of biota sample pretreatments for arsenic speciation with coupled HPLC-HG-ICP-MS, 401
- Determination of boron in uniformly-doped silicon thin films by isotope dilution inductively coupled plasma mass spectrometry, 493
- Determination of mercury species by capillary zone electrophoresis-inductively coupled plasma mass spectrometry: a comparison of two spray chamber-nebulizer combinations, 705
- Application of sample pre-oxidation of arsenite in human urine prior to speciation via on-line photo-oxidation with membrane hydride generation and ICP-MS detection, 1215
- Binding patterns of co-existing aluminium and iron to human serum transferrin studied by HPLC-high resolution ICP-MS, 1962
- Metal distribution patterns in the mussel *Mytilus edulis* cytosols using size-exclusion chromatography and double focusing ICP-MS detection, 2223

INDUSTRIAL

A novel flow injection procedure for determination of phosphate in industrial raw phosphoric acid, 1211

INFRARED REFLECTANCE SPECTROSCOPY

An infrared reflectance spectroscopic study of a pH-tunable network of nanoparticles linked by hydrogen bonding, 17

INFRARED SPECTROSCOPY

Evaluation of analytical instrumentation. Part XIV. Instrumentation for Fourier transform infrared spectrometry, 375

IR chemical sensor for detection of chlorinated anilines in aqueous solutions based on ATR waveguides coated with derivatized polystyrene, 1605

Development of an automated method for determining oil in water by direct aqueous supercritical fluid extraction coupled on-line with infrared spectroscopy, 2356

INTERFERENT

The generalized H-point standard-additions method to determine analytes present in two different chemical forms in unknown matrix samples Part I. General considerations, 771

INTERFEROMETRY

Refractometric discrimination of void-space filling and swelling during vapour sorption in polymer films, 2173

INTERLABORATORY TRIAL

An interlaboratory trial to study the transferability of a spectral library for the identification of solvents using near-infrared spectroscopy, 1817

IODIDE

Determination of iodide by derivatization to 4-iodo-*N,N*-dimethylaniline and gas chromatography-mass spectrometry, 459

Chemiluminescence determination of iodide and/or iodine using a luminol-hexadecyltrimethylammonium chloride reversed micelle system following on-line oxidation and extraction, 759

IODINE

Development of an iodine sensor based on fluorescence energy transfer, 1441

Improved measurement of iodine in food samples using inductively coupled plasma isotope dilution mass spectrometry, 1977

ION ASSOCIATION

Analysis of ion association reactions in aqueous solutions between alkali metal-crown ether complexes and pairing anions by capillary zone electrophoresis, 699

ION CHROMATOGRAPHY

Simultaneous separation of common mono- and divalent cations by ion chromatography with indirect photometric detection using an unmodified silica gel column and tyramine-oxalic acid-15-crown-5 as eluent, 269

Feasibility study of ion-chromatography microwave assisted on-line species conversion hydride generation atomic absorption spectrometry for selenium speciation analysis of biological material, 273

Determination of inorganic anions in biological fluids with direct sample injection by electrostatic ion chromatography using zwitterionic micelles in both stationary and mobile phases, 447

Major sensitivity improvements in ion chromatography determinations involving post-column spectrophotometric reaction detectors through elimination of pump noise using a dual wavelength monitoring procedure, 803

Continuous and simultaneous determination of anions and cations in rainwater by ion chromatography, 1065

Application of sample pre-oxidation of arsenite in human urine prior to speciation via on-line photo-oxidation with membrane hydride generation and ICP-MS detection, 1215

Open-tubular ion-exchange capillary electrochromatography of inorganic anions, 1235

Simultaneous amperometric detection of electroinreactive anions and cations in ion chromatography, 1799

The ion chromatographic separation of high valence metal cations using a neutral polystyrene resin dynamically modified with dipicolinic acid, 2157

ION EXCHANGE

On-capillary ion-exchange preconcentration of inorganic anions using open-tubular capillaries followed by elution with a transient isotachophoretic gradient, 799

ION EXCHANGE CAPILLARY ELECTROCHROMATOGRAPHY

Open-tubular ion-exchange capillary electrochromatography of inorganic anions, 1235

ION EXCHANGE CHROMATOGRAPHY

Determination of trace zirconium and hafnium in basaltic rocks by inductively coupled plasma atomic emission spectrometry after chemical separation: an evaluation of two methods based on extraction chromatography, 453

Speciation of Cu, Fe and Mn in beer using ion exchange separation and size-exclusion chromatography in combination with electrothermal atomic absorption spectrometry, 1933

Ion chromatographic analysis of hydronium ion using ODS modified with dodecylsulfate as the stationary phase, 2160

ION EXCHANGER

Salbutamol plastic membrane electrodes based on individual and mixed ion-exchangers of salbutamolium phosphotungstate and phosphomolybdate, 1129

ION-EXCLUSION CHROMATOGRAPHY

Amperometric detection studies of poly-*o*-phenylenediamine film for the determination of electroinreactive anions in ion-exclusion chromatography, 1453

ION-SELECTIVE ELECTRODE

Properties of the ion-selective electrode with a chelating pseudo-liquid membrane phase for zinc determination, 527

Determination of silver in photographic emulsion: comparison of traditional solid-state electrodes and a new ion-selective membrane electrode, 1447

Mercury(II) ion-selective electrode. Study of 1,3-diphenylthiourea as ionophore, 1787

Point-of-need diagnosis of cystic fibrosis using a potentiometric ion-selective electrode array, 2264

Bismetalloporphyrin-based ISE sensitive to fluoroborate, 2285

ION TRAP

Nano-electrospray and microbore liquid chromatography-ion trap mass spectrometry studies of copper complexation with MHC restricted peptides, 599

IONIC STRENGTH

Multivariate standardization for correcting the ionic strength variation on potentiometric sensor arrays, 883

IONOPHORE

Characterization of ionophore-metal complexes by infrared multiphoton photodissociation and collision activated dissociation in a quadrupole ion trap mass spectrometer, 641

Ionophores based on 1,3-dithiole-2-thione-4,5-dithiolate (DMIT) as potentiometric silver sensors, 861

Mercury(II) ion-selective electrode. Study of 1,3-diphenylthiourea as ionophore, 1787

IRON

Determination of cobalt and iron in estuarine and coastal waters using flow injection with chemiluminescence detection, 51

Iron(III) ionophores based on formylsalicylic acid derivatives as sensors for ion-selective electrodes, 179

Fluorimetric determination of iron using

5-(4-methoxyphenylazo)-8-(4-toluenesulfonamido)quinoline, 1661

Single vessel procedure for acid-vapour partial digestion in a focused microwave: Fe and Co determination in biological samples by ETAAS, 1861

Speciation of Cu, Fe and Mn in beer using ion exchange separation and size-exclusion chromatography in combination with electrothermal atomic absorption spectrometry, 1933

A robust multisyringe system for process flow analysis Part II. A multi-commuted injection system applied to the photometric determination of free acidity and iron(III) in metallurgical solutions, 2364

IRON TETRASULFONATOPHTHALOCYANINE

Temperature modulated solubility and activity alteration for oligo-(*N*-isopropylacrylamide)-iron tetrasulfonatophthalocyanine conjugates as a new mimetic peroxidase, 719

ISOCYANATE

Development of a new approach for total isocyanate determination using the reagent 9-anthracenylmethyl 1-piperazinecarboxylate, 1691

Determination of airborne methyl isocyanate as dibutylamine or 1-(2-methoxyphenyl)piperazine derivatives by liquid and gas chromatography, 1949

ISOTACHOPHORETIC GRADIENT

On-capillary ion-exchange preconcentration of inorganic anions using open-tubular capillaries followed by elution with a transient isotachophoretic gradient, 799

ISOTOPE DILUTION

Determination of boron in uniformly-doped silicon thin films by isotope dilution inductively coupled plasma mass spectrometry, 493

Trace-level determination of 1,4-dioxane in water by isotopic dilution GC and GC-MS, 1403

Improved measurement of iodine in food samples using inductively coupled plasma isotope dilution mass spectrometry, 1977

High accuracy isotope dilution analysis for the determination of ethanol using gas chromatography-combustion-isotope ratio mass spectrometry, 2189

ISOTOPE RATIO MASS SPECTROMETRY

High accuracy isotope dilution analysis for the determination of ethanol using gas chromatography-combustion-isotope ratio mass spectrometry, 2189

JANUS GREEN B

Interactions of Janus Green B with double stranded DNA and the determination of DNA based on the measurement of enhanced resonance light scattering, 1267

KEROSENE

Effect of sample geometry on synchronous fluorimetric analysis of petrol, diesel, kerosene and their mixtures at higher concentration, 1383

KINETICS

Sensitive determination of diquat by a kinetic method using the stopped-flow mixing technique, 2372

KOHÖNEN NETWORK

Discrimination of chemically similar organic vapours and vapour mixtures using the Kohonen network, 65

L-DOPA

Bioavailability studies of oral dosage forms containing levodopa and carbidopa using column-switching chromatography followed by electrochemical detection, 439

LACTOSE

Novel glucose non-interference biosensor for lactose detection based on galactose oxidase-peroxidase with and without co-immobilised β -galactosidase, 1285

LANTHANIDE PORPHYRIN COMPLEX

A novel ethacrynic acid sensor based on a lanthanide porphyrin complex in a PVC matrix, 867

LASER-INDUCED FLUORESCENCE

Violet (405 nm) diode laser for laser induced fluorescence detection in capillary electrophoresis, 1049

Axially illuminated fluorescence imaging detection for capillary isoelectric focusing on Teflon capillary, 1231

LAUREL OIL

An approach to the static-dynamic subcritical water extraction of laurel essential oil: comparison with conventional techniques, 481

LEAD

Electrochemical studies of complexation of Pb in red wines, 743

A study of the preconcentration and stripping voltammetry of Pb(II) at carbon electrodes, 1135

Electrochemical impedance study and sensitive voltammetric determination of Pb(II) at electrochemically activated glassy carbon electrodes, 1139

Determination of lead in fish samples by slurry sampling electrothermal atomic absorption spectrometry, 1491

LIGANDS

Cross-referenced combinatorial libraries for the discovery of metal-complexing ligands: library deconvolution by LC-MS, 2206

LIGHT STABILIZER

Direct determination of a polymeric hindered amine light stabilizer in polypropylene by thermal desorption-gas chromatography assisted by in-line chemical reaction, 465

LIMINESCENCE

Peroxidase enhanced lanthanide luminescence—a new technique for the evaluation of bioassays, 1537

LIPOPOLYSACCHARIDE

Rapid isolation method for lipopolysaccharide and lipid A from Gram-negative bacteria, 651

LIQUID CHROMATOGRAPHY

Liquid chromatography on-chip: progression towards a μ -total analysis system, 25

Automatic semi-microcolumn liquid chromatographic determination of catecholamines in rat plasma utilizing peroxyxalate chemiluminescence reaction, 293

Determination and quantification of sulfadiazine and trimethoprim in swine tissues using liquid chromatography with ultraviolet and mass spectrometric detection, 409

Simultaneous determination of fat-soluble vitamins and provitamins in dairy products by liquid chromatography with a narrow-bore column, 427

Nano-electrospray and microbore liquid chromatography-ion trap mass spectrometry studies of copper complexation with MHC restricted peptides, 599

Direct determination of *t,t*-muconic acid in human urine by two-dimensional liquid chromatography, 689

Determination of mercapturic acids in urine by solid-phase extraction followed by liquid chromatography-electrospray ionization mass spectrometry, 715

Direct coupling of microcolumn liquid chromatography with in-tube solid-phase microextraction for the analysis of antidepressant drugs, 807

Studies on neurosteroids. Part XIII. Characterization of catechol estrogens in rat brains using liquid chromatography-mass spectrometry-mass spectrometry, 811

Indirect amperometric detection of underivatized amino acids in microcolumn liquid chromatography with carbon film based ring-disk electrodes, 1041

Derivatization of tertiary amphetamines with 9-fluorenylmethyl chloroformate for liquid chromatography: determination of *N*-methylephedrine, 1071

Determination of *N,N*-dimethylaminoethyl chloride and the dimethylaziridinium ion at sub-ppm levels in diazepam hydrochloride by LC-MS with electrospray ionisation, 1255

Evaluation of anti-pyrene and anti-fluorene immunoabsorbent clean-up for PAHs from sludge and sediment reference materials followed by liquid chromatography and diode array detection, 1273

Rapid confirmatory assay for the simultaneous detection of ronidazole, metronidazole and dimetridazole in eggs using liquid chromatography-tandem mass spectrometry, 1533

The thermodynamic properties of methanol-water association and its effect on solute retention in liquid chromatography, 1543

A restricted access medium column for the trace determination of triadimefon and tetraconazole in water with large-volume injection coupled-column RPLC with UV detection, 1549

Monofluorinated polycyclic aromatic hydrocarbons: characteristics and intended use in environmental analysis, 1699

Determination of airborne methyl isocyanate as dibutylamine or 1-(2-methoxyphenyl)piperazine derivatives by liquid and gas chromatography, 1949

Determination of triazine herbicides in foods with liquid chromatography mass spectrometry, 1966

Optimization strategy for liquid chromatography-electrospray ionization mass spectrometry methods, 1970

Cross-referenced combinatorial libraries for the discovery of metal-complexing ligands: library deconvolution by LC-MS, 2206

Determination of three anabolic compounds in calf urine by liquid chromatography with photodiode-array detection, 2230

LIQUID CHROMATOGRAPHY MASS SPECTROMETRY

Determination of haloacetic acids in water by liquid chromatography-electrospray ionization mass spectrometry using volatile ion-pairing reagents, 1097

LIQUID MEMBRANES

Use of supported liquid membranes incorporated in a flow system for the direct determination of eugenol in spice samples, 1805

LIQUID SCINTILLATION COUNTING

Determination of carbon-14 levels in heavy water and groundwaters, 59

LIVER

Chemiluminescence detection of nine corticosteroids in liver, 2071

LUBRICATING OIL

Comparative study of electrothermal atomic absorption spectrometric methods for the determination of silver in used lubricating oils, 1673

Determination of metals in lubricating oils by flame atomic absorption spectrometry using a single-bore high-pressure pneumatic nebulizer, 2344

LUMINESCENCE

Optical oxygen sensing based on the luminescence change of metalloporphyrins immobilized in styrene-pentafluorostyrene copolymer film, 871

Application of principal component regression to luminescence data for the screening of ciprofloxacin and enrofloxacin in animal tissues, 1155

Terbium-sensitized luminescence determination of levofloxacin in tablets and human urine and serum, 1851

LUMINOL

Luminol electrochemiluminescence with screen-printed electrodes for low-cost disposable oxidase-based optical sensors, 789

Enhancement of luminol chemiluminescence by cysteine and glutathione, 1902

MAGNETIC-DIRECT ACOUSTIC WAVE DEVICE

Surface energy and the response of transverse acoustic wave devices in liquids, 1525

MALDI

Investigation of amine and polyol functionality in extracts of polyurethane wound management dressings using MALDI-MS, 111

MALDI-MS and colorimetric analysis of diisocyanate and polyol migrants from model polyurethane adhesives used in food packaging, 115

MANGANESE

Speciation of Cu, Fe and Mn in beer using ion exchange separation and size-exclusion chromatography in combination with electrothermal atomic absorption spectrometry, 1933

MASS SPECTROMETRY

Trace level analysis of VOCs and semi-VOCs in aqueous solution using a direct insertion membrane probe and trap and release membrane introduction mass spectrometry, 21

Analytical atomic spectrometry going into the next millennium: photons or ions, atoms or molecules?, 35

Selenium speciation in enriched and natural samples by HPLC-ICP-MS and HPLC-ESI-MS with perfluorinated carboxylic acid ion-pairing agents, 71

Investigation of amine and polyol functionality in extracts of polyurethane wound management dressings using MALDI-MS, 111

Rapid analysis of illicit drugs by mass spectrometry: Results from seizures in Ireland, 119

Capillary electrophoresis as a practical tool in the study of novel rigid amino alcohols derived from (+)-camphor for catalytic enantioselective addition of organozincs to aldehydes, 185

Direct detection of large fat-soluble biomolecules in solution using membrane inlet mass spectrometry and desorption chemical ionization, 211

High-performance liquid chromatography and inductively coupled plasma mass spectrometry (HPLC-ICP-MS) for the analysis of xenobiotic metabolites in rat urine: application to the metabolites of 4-bromoaniline, 235

Deconvolution of a three-component co-eluting peak cluster in gas chromatography-mass spectrometry, 287

Determination and quantification of sulfadiazine and trimethoprim in swine tissues using liquid chromatography with ultraviolet and mass spectrometric detection, 409

Electrospray mass spectrometric determination of 1-nitropyrene and non-substituted polycyclic aromatic hydrocarbons using tropylium cation as a post-column HPLC reagent, 417

Determination of iodide by derivatization to 4-iodo-*N,N*-dimethylalanine and gas chromatography-mass spectrometry, 459

An approach to the static-dynamic subcritical water extraction of laurel essential oil: comparison with conventional techniques, 481

- Use and analysis by thermal ionisation mass spectrometry of ^{26}Mg and ^{41}K to assess mineral uptake in Scots pine (*Pinus sylvestris* L.), 487
 Direct cellular assays using off-line capillary electrophoresis with matrix-assisted laser desorption/ionization time-of-flight mass spectrometry, 555
 Oligomerization and substrate binding studies of the adenylate kinase from *Sulfolobus acidocaldarius* by matrix-assisted laser desorption/ionization mass spectrometry, 563
 Identification of major histocompatibility complex class II-associated peptides derived from freshly prepared rat Langerhans cells using MALDI-PSD and Edman degradation, 569
 A comparative study on methods of optimal sample preparation for the analysis of oligonucleotides by matrix-assisted laser desorption/ionization mass spectrometry, 575
 Binding of selected carbohydrates to apo-concanavalin A studied by electrospray ionization mass spectrometry, 583
 Characterization of ginseng saponins using electrospray mass spectrometry and collision-induced dissociation experiments of metal-attachment ions, 591
 Nano-electrospray and microbore liquid chromatography-ion trap mass spectrometry studies of copper complexation with MHC restricted peptides, 599
 HPLC-electrospray mass spectrometry for the analysis of temoporfin-poly(ethylene glycol) conjugates, 605
 Electrospray mass spectrometry and collision-induced fragmentation of 2-aminobenzamide-labelled neutral N-linked glycans, 609
 Preparation of single-stranded PCR products for electrospray ionization mass spectrometry using the DNA repair enzyme lambda exonuclease, 619
 Structural analysis of drug-DNA adducts by tandem mass spectrometry, 627
 C-terminal peptide sequencing using acetylated peptides with MSⁿ in a quadrupole ion trap, 635
 Characterization of ionophore-metal complexes by infrared multiphoton photodissociation and collision activated dissociation in a quadrupole ion trap mass spectrometer, 641
 Rapid isolation method for lipopolysaccharide and lipid A from Gram-negative bacteria, 651
 Zwitterionic vs. charge-solvated structures in the binding of arginine to alkali metal ions in the gas phase, 657
 Determination of estrone and 17β -estradiol in human hair by gas chromatography-mass spectrometry, 711
 Studies on neurosteroids. Part XIII. Characterization of catechol estrogens in rat brains using liquid chromatography-mass spectrometry-mass spectrometry, 811
 Do matrix-assisted laser desorption/ionization mass spectra reflect solution-phase formation of cyclodextrin inclusion complexes?, 849
 Flow injection spectroscopic analysis of model drugs using on-line UV-diode array, FT-infrared and ^1H -nuclear magnetic resonance spectroscopy and time-of-flight mass spectrometry, 927
 Studies on the speciation of inorganic and organic antimony compounds in airborne particulate matter by HPLC-ICP-MS, 1025
 Studies on metal-ion complex formation of crown ether derivatives incorporating a photoionizable spirobenzopyran moiety by electrospray ionization mass spectrometry, 1091
 Determination of haloacetic acids in water by liquid chromatography-electrospray ionization-mass spectrometry using volatile ion-pairing reagents, 1097
 Measurement of β -agonist residues in retinal tissue of food producing animals, 1103
 Application of sample pre-oxidation of arsenite in human urine prior to speciation via on-line photo-oxidation with membrane hydride generation and ICP-MS detection, 1215
 Determination of sulfonamides by packed column supercritical fluid chromatography with atmospheric pressure chemical ionisation mass spectrometric detection, 1243
 Determination of *N,N*-dimethylaminoethyl chloride and the dimethylaziridinium ion at sub-ppm levels in diltiazem hydrochloride by LC-MS with electrospray ionisation, 1255
 Splitless large-volume GC-MS injection for the analysis of organophosphorus and organochlorine pesticides in vegetables using a miniaturised ethyl acetate extraction, 1397
 Trace-level determination of 1,4-dioxane in water by isotopic dilution GC and GC-MS, 1403
 Electrospray and APCI analysis of polyhydroxyalkaloids using positive and negative collision induced dissociation experiments in a quadrupole ion trap, 1409
 A new method for the selective quantitation of cyanogenic glycosides by membrane introduction mass spectrometry, 1529
 Rapid confirmatory assay for the simultaneous detection of ronidazole, metronidazole and dimetridazole in eggs using liquid chromatography-tandem mass spectrometry, 1533
 Clean-up, detection and determination of salbutamol in human urine and serum, 1569
 Determination of gentamicin after trimethylsilylimidazole and trifluoroacetic anhydride derivatization using gas chromatography and negative ion chemical ionization ion trap mass spectrometry, 1573
 Determination of steroid hormones by membrane inlet mass spectrometry and desorption chemical ionization, 1577
 Determination of pesticides in soil samples by supercritical fluid chromatography-atmospheric pressure chemical ionisation mass spectrometric detection, 1751
 A quantitative extraction method for the determination of trace amounts of both butyl- and phenyltin compounds in sediments by gas chromatography-inductively coupled plasma mass spectrometry, 1757
 Detection of diazepam in horse hair samples by mass spectrometric methods, 1765
 Determination of triazine herbicides in foods with liquid chromatography mass spectrometry, 1966
 Optimization strategy for liquid chromatography-electrospray ionization mass spectrometry methods, 1970
 Improved measurement of iodine in food samples using inductively coupled plasma isotope dilution mass spectrometry, 1977
 High accuracy isotope dilution analysis for the determination of ethanol using gas chromatography-combustion-isotope ratio mass spectrometry, 2189
 A rapid method for the determination of lasalocid in animal tissues and eggs by high performance liquid chromatography with fluorescence detection and confirmation by LC-MS-MS, 2196
 Cross-referenced combinatorial libraries for the discovery of metal-complexing ligands: library deconvolution by LC-MS, 2206
- MATHEMATICS**
 Authentication of Galician (N.W. Spain) honeys by multivariate techniques based on metal content data, 307
 Comparison of wavelet transform and Fourier self-deconvolution (FSD) and wavelet FSD for curve fitting, 915
 A simple, all-purpose nonlinear algorithm for univariate calibration, 1045
 Multivariate analysis of reagent profiles for slow reactions using PLS analysis, 1709
 Novel flow injection methods for drug-receptor interaction studies, based on probing cell metabolism, 1889
 Mathematical analysis for impedance change with proteolytic digestion of gelatin, 2289
- MATRIX-ASSISTED LASER DESORPTION/IONIZATION**
 Direct cellular assays using off-line capillary electrophoresis with matrix-assisted laser desorption/ionization time-of-flight mass spectrometry, 555
 Oligomerization and substrate binding studies of the adenylate kinase from *Sulfolobus acidocaldarius* by matrix-assisted laser desorption/ionization mass spectrometry, 563
 Identification of major histocompatibility complex class II-associated peptides derived from freshly prepared rat Langerhans cells using MALDI-PSD and Edman degradation, 569
 A comparative study on methods of optimal sample preparation for the analysis of oligonucleotides by matrix-assisted laser desorption/ionization mass spectrometry, 575
 Do matrix-assisted laser desorption/ionization mass spectra reflect solution-phase formation of cyclodextrin inclusion complexes?, 849
- MDMA**
 Composition profiling of seized ecstasy tablets by Raman spectroscopy, 1811
- MELATONIN**
 Chemiluminescence of indole compounds based on oxidation with singlet oxygen generated chemically by the sodium molybdate-hydrogen peroxide system, 2075
- MEMBRANE INLET MASS SPECTROMETRY**
 Direct detection of large fat-soluble biomolecules in solution using membrane inlet mass spectrometry and desorption chemical ionization, 211
 Determination of steroid hormones by membrane inlet mass spectrometry and desorption chemical ionization, 1577
- MEMBRANE INTRODUCTION MASS SPECTROMETRY**
 A new method for the selective quantitation of cyanogenic glycosides by membrane introduction mass spectrometry, 1529
- MERCAPTURIC ACID**
 Determination of mercapturic acids in urine by solid-phase extraction followed by liquid chromatography-electrospray ionization mass spectrometry, 715
- MERCURY**
 Focused microwave Soxhlet device for rapid extraction of mercury, arsenic and selenium from coal prior to atomic fluorescence detection, 317
 Storage of natural water samples for total and reactive mercury analysis in PET bottles, 549
 Determination of mercury species by capillary zone electrophoresis-inductively coupled plasma mass spectrometry: a comparison of two spray chamber-nebulizer combinations, 705
 The use of a remote stripping sensor for the determination of copper and mercury in the Lagoon of Venice, 731
 Determination of elemental mercury by cavity ringdown spectrometry, 1021
 Flow injection-liquid chromatography-cold vapour atomic absorption spectrometry for rapid determination of methyl and inorganic mercury, 1193
 Mercury(II) ion-selective electrode. Study of 1,3-diphenylthiourea as ionophore, 1787
- METABOLITES**
 High-performance liquid chromatography and inductively coupled plasma

- mass spectrometry (HPLC-ICP-MS) for the analysis of xenobiotic metabolites in rat urine: application to the metabolites of 4-bromoaniline, 235
- METAL**
Properties of chelating sorbents prepared by impregnation of LiChroprep RP-8 and LiChroprep RP-18 with ion pairs formed by Aliquat 336 and Nitroso-R-Salt, 297
Homogeneous liquid-liquid extraction followed by X-ray fluorescence spectrometry of a microdroplet on filter-paper for the simultaneous determination of small amounts of metals, 797
Comparison between sequential extraction procedures and single extractions for metal partitioning in sewage sludge samples, 1353
Development of a wide bore flow through microwave digestion device for the determination of trace metals in soil, 1875
Ion association reactions in aqueous solutions between non-UV-absorbing crown ether-alkali metal complexes with picrate ion by capillary zone electrophoresis, 1928
The ion chromatographic separation of high valence metal cations using a neutral polystyrene resin dynamically modified with dipicolinic acid, 2157
Determination of metals in lubricating oils by flame atomic absorption spectrometry using a single-bore high-pressure pneumatic nebulizer, 2344
- METAL COMPLEXES**
Voltammetric measurements of the interaction of metal complexes with nucleic acids, 1791
- METAL SORPTION**
Thiosalicylic acid-immobilized Amberlite XAD-2: metal sorption behaviour and applications in estimation of metal ions by flame atomic absorption spectrometry, 2350
- METALLOPORPHYRIN**
An oxygen sensing system based on the phosphorescence quenching of metalloporphyrin thin film on alumina plates, 1601
- MICELLAR ELECTROKINETIC CHROMATOGRAPHY**
On-line concentration in micellar electrokinetic chromatography for triazine determination in water samples: evaluation of three different stacking modes, 1725
Comparative study of capillary zone electrophoresis and micellar electrokinetic capillary chromatography for the separation of naphthalenedisulfonate isomers, 2236
- MICELLE**
Study of the fluorescence characteristics of norfloxacin in reversed micelles and application in analysis, 1477
Micellar electrokinetic chromatography of monohydroxybenzo[*a*]pyrene positional isomers using γ -cyclodextrin, 1555
- MICRODIALYSIS**
Microdialysis sampling with on-line microbore HPLC for the determination of tirapazamine and its reduced metabolites in rats, 105
Determination of saccharides in wastewater from the beverage industry by microdialysis sampling, microbore high performance anion exchange chromatography and integrated pulsed electrochemical detection, 1379
- MICROFLOW ANALYZER**
Lab-on-valve: universal microflow analyzer based on sequential and bead injection, 1053
- MICROSCALE**
Lab-on-valve: universal microflow analyzer based on sequential and bead injection, 1053
Fluorescence IgG immunosensor based on a micro flow cell containing controlled pore glass as immobilisation support, 1387
- MICROTITRE PLATE ASSAY**
A microtitre plate assay for the detection of antibiotics in porcine urine, 395
- MICROWAVE DECOMPOSITION**
Determination of impurity elements in high purity graphite by inductively coupled plasma atomic emission spectrometry after microwave decomposition, 1189
- MICROWAVE DIGESTION**
The minimisation of *aqua regia* cross contamination in PFA and TFM microwave digestion vessels using silver as an indicator, 327
Development of a wide bore flow through microwave digestion device for the determination of trace metals in soil, 1875
- MICROWAVE EXTRACTION**
Microwave assisted process for methidathion in water samples for physicochemical studies, 1199
On-line preconcentration and separation of platinum using thiourea modified silica gel with microwave assisted desorption for FAAS determination, 1205
- MILK**
Simultaneous determination of fat-soluble vitamins and provitamins in dairy products by liquid chromatography with a narrow-bore column, 427
Enzymatic determination of choline in milk using a FIA system with potentiometric detection, 1281
Novel glucose non-interference biosensor for lactose detection based on galactose oxidase-peroxidase with and without co-immobilised β -galactosidase, 1285
Single-use phosphorimetric sensor for the determination of nalidixic acid in human urine and milk, 2000
- MINERALS**
Use and analysis by thermal ionisation mass spectrometry of ^{26}Mg and ^{41}K to assess mineral uptake in Scots pine (*Pinus sylvestris* L.), 487
- MINATURIZATION**
Liquid chromatography on-chip: progression towards a μ -total analysis system, 25
A capillary electrophoresis microchip for the analysis of photographic developer solutions using indirect fluorescence detection, 133
- MITOXANTRONE**
Study of the electrochemical behavior of mitoxantrone and its determination at a Co-C modified ultramicroelectrode, 2299
- MODELLING**
Models for estimating the non-specific toxicity of organic compounds in short-term bioassays, 127
The generalized H-point standard-additions method to determine analytes present in two different chemical forms in unknown matrix samples Part I. General considerations, 771
- MOLECULAR MODELLING**
Application of artificial neural networks coupled with an orthogonal design and optimization algorithms to multifactor optimization of a new FIA system for the determination of uranium(VI) in ore samples, 921
- MOLECULAR RECOGNITION**
Competitive assay of 2,4-dichlorophenoxyacetic acid using a polymer imprinted with an electrochemically active tracer closely related to the analyte, 665
- MOLECULAR SPECTROMETRY**
Molecular spectrometry—milestones for the millennium, 45
- MOLECULARLY IMPRINTED POLYMER**
An enzyme-linked molecularly imprinted sorbent assay, 13
Measurement of the continuous distribution of binding sites in molecularly imprinted polymers, 1261
A molecularly imprinted polymer for 17 α -ethynodiol evaluated by immunoassay, 1415
Efficient sample pre-concentration of bupivacaine from human plasma by solid-phase extraction on molecularly imprinted polymers, 1515
Enantioselective uptake of amino acid with overoxidized polypyrrole colloid templated with L-lactate, 2249
- MONOCLONAL ANTIBODY**
Production of monoclonal antibody against a major purgative component, senoside A, its characterization and ELISA, 1109
- MORPHOLINE**
Determination of morpholine fungicides using the tris(2,2'-bipyridine)ruthenium(II) chemiluminescence reaction, 765
- MOXIDECTIN**
Validation and robustness testing of a HPLC method for the determination of avermectins and moxidectin in animal liver samples using an alumina column clean-up, 1741
- MUCONIC ACID**
Direct determination of *t,t*-muconic acid in human urine by two-dimensional liquid chromatography, 689
- MULTIPLE LINEAR REGRESSION**
Introduction to multivariate calibration in analytical chemistry, 2125
- MULTIVARIATE CALIBRATION**
Potentiality of proton nuclear magnetic resonance and multivariate calibration methods for the determination of dermatan sulfate contamination in heparin samples, 933
Trace determination of carbendazim, fuberidazole and thiabendazole in water by application of multivariate calibration to cross-sections of three-dimensional excitation–emission matrix fluorescence, 1167
Determination of the penetration value of bitumens by near infrared spectroscopy, 1823
Modified microelectrodes and multivariate calibration for flow injection amperometric simultaneous determination of ascorbic acid, dopamine, epinephrine and dipryone, 2011
Strategies for solving matrix effects in the analysis of triphenyltin in sea-water samples by three-way multivariate curve resolution, 2038
Introduction to multivariate calibration in analytical chemistry, 2125
- MULTIVARIATE QUALITY CONTROL**
The potential of multivariate quality control as a diagnostic tool in geanalysis, 2032
- MULTIVARIATE STANDARDIZATION**
Multivariate standardization for correcting the ionic strength variation on potentiometric sensor arrays, 883
- MUSSEL**
Metal distribution patterns in the mussel *Mytilus edulis* cytosols using size-exclusion chromatography and double focusing ICP-MS detection, 2223
- N-ACYLTHIOUREAS**
Cross-referenced combinatorial libraries for the discovery of metal-complexing ligands: library deconvolution by LC-MS, 2206
- N-ALKANE**
The authentication of olive oil on the basis of hydrocarbon concentration and composition, 97
- N-TETRAHYDROBENZOTHIAZOLYL IMINES**
Flow injection chemiluminescence determination of *N*-tetrahydrobenzothiazolyl imines, 753

NALIDIXIC ACID

Single-use phosphorimetric sensor for the determination of nalidixic acid in human urine and milk, 2000

NANOBIOTECHNOLOGY

Nanobiotechnology and its role in the development of new analytical devices, 29

NANOPARTICLES

An infrared reflectance spectroscopic study of a pH-tunable network of nanoparticles linked by hydrogen bonding, 17

NEAR-INFRARED SPECTROSCOPY

Evaluation of analytical instrumentation. Part XIII. Instrumentation for UV-visible-NIR spectrometry, 367

On-line monitoring of starch enzymatic hydrolysis by near-infrared spectroscopy, 749

Meeting the International Conference on Harmonisation's Guidelines on Validation of Analytical Procedures: Quantification as exemplified by a near-infrared reflectance assay of paracetamol in intact tablets, 1341

An interlaboratory trial to study the transferability of a spectral library for the identification of solvents using near-infrared spectroscopy, 1817

Determination of the penetration value of bitumens by near infrared spectroscopy, 1823

On-line monitoring and quantification of a process reaction by near-infrared spectroscopy. Catalysed esterification of butan-1-ol by acetic acid, 2059

Polymorphic analysis of a pharmaceutical preparation by NIR spectroscopy, 2311

Monitoring the melt-extrusion transesterification of ethylene-vinylacetate copolymer by self-modeling curve resolution analysis of on-line near-infrared spectra, 2315

NEBULIZER

Determination of metals in lubricating oils by flame atomic absorption spectrometry using a single-bore high-pressure pneumatic nebulizer, 2344

NEURAL NETWORKS

Authentication of Galician (N.W. Spain) honeys by multivariate techniques based on metal content data, 307

Flow injection analysis of fluoride: optimization of experimental conditions and non-linear calibration using artificial neural networks, 2376

NEUROSTEROIDS

Studies on neurosteroids. Part XIII. Characterization of catechol estrogens in rat brains using liquid chromatography-mass spectrometry-mass spectrometry, 811

NICKEL

Optimization of a new activated carbon based sorbent for on-line preconcentration and trace determination of nickel in aquatic samples using mixed-level orthogonal array design, 1649

Fusion method for preparation of refractory nickel based alloy powders for X-ray fluorescence spectrometry, 1681

NITRATE

Electrochemical detection of nitrate and nitrite at a copper modified electrode, 737

NITRIC OXIDE

A novel electrochemical microsensor for the determination of NO and its application to the study of the NO donor S-nitrosoglutathione, 163

Electrocatalytic oxidation of NO at electrode modified with Nafion-Co^{II}-1,10-phenanthroline film and its application to NO detection, 793

Measurement of nitric oxide released in the rat heart with an amperometric microsensor, 1435

Nitric oxide solutions: standardisation by chronoamperometry using a platinum disc microelectrode, 1629

A dual electrochemical sensor for nitrite and nitric oxide, 2169

NITRITE

Sequential injection spectrophotometric analysis of nitrite in natural waters using an on-line solid-phase extraction and preconcentration method, 943

Renewable-surface amperometric nitrite sensor based on sol-gel-derived silicomolybdate-methylsilicate-graphite composite material, 1291

Optical biosensing of nitrite ions using cytochrome *cd*₁ nitrite reductase encapsulated in a sol-gel matrix, 1993

A dual electrochemical sensor for nitrite and nitric oxide, 2169

NITRO COMPOUNDS

Enhanced chemiluminescent determination of chloramphenicol and related nitro compounds by 'on-line' photochemical reaction, 1313

NITROGEN

Report by the Analytical Methods Committee. Nitrogen factors for chicken meat, 1359

NITROGEN FACTOR

Nitrogen factor for *Nephrops norvegicus* (scampi), 347

NORFLOXACIN

Study of the fluorescence characteristics of norfloxacin in reversed micelles and application in analysis, 1477

NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY

Flow injection spectroscopic analysis of model drugs using on-line UV-diode array, FT-infrared and ¹H-nuclear magnetic resonance spectroscopy and time-of-flight mass spectrometry, 927

Potentiality of proton nuclear magnetic resonance and multivariate

calibration methods for the determination of dermatan sulfate contamination in heparin samples, 933

Identification and determination of the main constituents of phenol tar with carbon- and proton-NMR spectroscopy, 1331

NUCLEIC ACID

Renewable pencil electrodes for highly sensitive stripping potentiometric measurements of DNA and RNA, 5

Voltammetric measurements of the interaction of metal complexes with nucleic acids, 1791

mRNA isolation in a microfluidic device for eventual integration of cDNA library construction, 2176

OIL

Development of an automated method for determining oil in water by direct aqueous supercritical fluid extraction coupled on-line with infrared spectroscopy, 2356

OLFACTOMETER OUTPUT CALIBRATION

Method for calibrating olfactometer output. Part 2. Amyl acetate, 1295

OLIGOMERIZATION

Oligomerization and substrate binding studies of the adenylate kinase from *Sulfobolus acidocaldarius* by matrix-assisted laser desorption/ionization mass spectrometry, 563

OLIGONUCLEOTIDES

A comparative study on methods of optimal sample preparation for the analysis of oligonucleotides by matrix-assisted laser desorption/ionization mass spectrometry, 575

OLIVE OIL

The authentication of olive oil on the basis of hydrocarbon concentration and composition, 97

ON-LINE MONITORING

On-line monitoring of starch enzymatic hydrolysis by near-infrared spectroscopy, 749

OPEN-TUBULAR CAPILLARY COLUMN

Sorption of volatile organics from water using an open-tubular, wall-coated capillary column, 469

OPTICAL PROBE

Single-molecule detection using confocal fluorescence detection: Assessment of optical probe volumes, 1033

OPTICAL SENSOR

A novel optical oxygen sensing system based on triplet-triplet reflectance of fullerene C₆₀-polystyrene film by time-resolved spectroscopy using diffuse reflectance laser flash photolysis, 523

Design of a simple optical sensor for the detection of concentrated hydroxide ions in an unusual pH range, 1783

Platinum porphyrin embedded in poly(l-trimethylsilyl-1-propyne) film as an optical sensor for trace analysis of oxygen, 1911

Optical biosensing of nitrite ions using cytochrome *cd*₁ nitrite reductase encapsulated in a sol-gel matrix, 1993

OPTODE

A glucose biosensor with enzyme-entrapped sol-gel and an oxygen-sensitive optode membrane, 157

Fluorescent optode membrane based on organogel for humidity sensing, 301

ORGANIC VAPOUR

Discrimination of chemically similar organic vapours and vapour mixtures using the Kohonen network, 65

OXIDATION

Relationship between theoretical oxygen demand and photocatalytic chemical oxygen demand for specific classes of organic chemicals, 1915

OXYGEN

A novel optical oxygen sensing system based on triplet-triplet reflectance of fullerene C₆₀-polystyrene film by time-resolved spectroscopy using diffuse reflectance laser flash photolysis, 523

Optical oxygen sensing based on the luminescence change of metalloporphyrins immobilized in styrene-pentafluorostyrene copolymer film, 871

Ratiometric oxygen sensing: detection of dual-emission ratio through a single emission filter, 1175

An oxygen sensing system based on the phosphorescence quenching of metalloporphyrin thin film on alumina plates, 1601

Platinum porphyrin embedded in poly(l-trimethylsilyl-1-propyne) film as an optical sensor for trace analysis of oxygen, 1911

A mediator-type biosensor as a new approach to biochemical oxygen demand estimation, 2280

OXYGEN RADICALS

Enhancement of luminol chemiluminescence by cysteine and glutathione, 1902

PALLADIUM

Synthesis of silica gel immobilized thiourea and its application to the on-line preconcentration and separation of silver, gold and palladium, 147

Separation and enrichment of palladium and gold in biological and environmental samples, adapted to the determination by total reflection X-ray fluorescence, 397

PARTIAL LEAST-SQUARES

Authentication of Galician (N.W. Spain) honeys by multivariate techniques based on metal content data, 307

Multivariate analysis of reagent profiles for slow reactions using PLS analysis, 1709

- On-line monitoring and quantification of a process reaction by near-infrared spectroscopy. Catalysed esterification of butan-1-ol by acetic acid, 2059
- Introduction to multivariate calibration in analytical chemistry, 2125
- PARTICLE SIZING**
- Size-elemental characterization of suspended particle matter by split-flow thin cell fractionation and slurry analysis-electrothermal atomic absorption spectrometry, 1335
- PARTICULATES**
- Assessment of X-ray photoelectron spectroscopy for analysis of particulate pollutants in urban air, 1703
- Multi-element analysis by inductively coupled plasma optical emission spectrometry of airborne particulate matter collected with a low-pressure cascade impactor, 1855
- PEPTIDE**
- Direct cellular assays using off-line capillary electrophoresis with matrix-assisted laser desorption/ionization time-of-flight mass spectrometry, 555
- Nano-electrospray and microbore liquid chromatography-ion trap mass spectrometry studies of copper complexation with MHC restricted peptides, 599
- C-terminal peptide sequencing using acetylated peptides with MSⁿ in a quadrupole ion trap, 635
- Development of water-soluble fluorogenic reagents having a 2,1,3-benzodiazole structure and their application to the determination of peptides, 1115
- PEPTIDE NUCLEIC ACID PROBE**
- Ultrasensitive, direct detection of a specific DNA sequence of *Bacillus anthracis* in solution, 9
- PEPTIDE SEQUENCING**
- C-terminal peptide sequencing using acetylated peptides with MSⁿ in a quadrupole ion trap, 635
- PESTICIDE**
- Extractive fluorimetric determination of malathion residues in water samples, 323
- Resolution by polarographic techniques of atrazine-simazine and terbutryn-prometryn binary mixtures by using PLS calibration and artificial neural networks, 909
- Microwave assisted process for methidathion in water samples for physicochemical studies, 1199
- Splitless large-volume GC-MS injection for the analysis of organophosphorus and organochlorine pesticides in vegetables using a miniaturised ethyl acetate extraction, 1397
- Estimation of precision and efficiency mass transfer steps for the determination of pesticides in vegetables aiming at the expression of results with reliable uncertainty, 1459
- A restricted access medium column for the trace determination of triadimenon and tetraconazole in water with large-volume injection coupled-column RPLC with UV detection, 1549
- On-line concentration in micellar electrokinetic chromatography for triazine determination in water samples: evaluation of three different stacking modes, 1725
- Determination of pesticides in soil samples by supercritical fluid chromatography-atmospheric pressure chemical ionisation mass spectrometric detection, 1751
- Flow injection-FTIR determination of dithiocarbamate pesticides, 1829
- Development of a rapid screening technique for organochlorine pesticides using solvent microextraction (SME) and fast gas chromatography (GC), 1943
- Determination of triazine herbicides in foods with liquid chromatography mass spectrometry, 1966
- Disposable potentiometric enzyme sensor for direct determination of organophosphorus insecticides, 2274
- Sensitive determination of diquat by a kinetic method using the stopped-flow mixing technique, 2372
- PETROLEUM**
- Determination of trace elemental sulfur and hydrogen sulfide in petroleum and its distillates by preliminary extraction with voltammetric detection, 903
- Effect of sample geometry on synchronous fluorimetric analysis of petrol, diesel, kerosene and their mixtures at higher concentration, 1383
- Determination of the penetration value of bitumens by near infrared spectroscopy, 1823
- PHARMACEUTICAL**
- Differential pulse voltammetric indirect determination of aluminium in drinking waters, blood, urine, hair, and medicament samples using L-dopa under alkaline conditions, 1299
- Determination of thioguanine in pharmaceutical preparations by paper substrate room temperature phosphorimetry, 1327
- Meeting the International Conference on Harmonisation's Guidelines on Validation of Analytical Procedures: Quantification as exemplified by a near-infrared reflectance assay of paracetamol in intact tablets, 1341
- Absorptive stripping voltammetric determination of ketoconazole in pharmaceutical preparations and urine using carbon paste electrodes, 1639
- The quantification of potassium using a quartz crystal microbalance, 1983
- Electrochemical oxidation at carbon paste electrode of tacrine and I-hydroxytacrine and differential pulse voltammetric determination of tacrine in pharmaceuticals and human urine, 2016
- Non-invasive determination of ethanol, propylene glycol and water in a multi-component pharmaceutical oral liquid by direct measurement through amber plastic bottles using Fourier transform near-infrared spectroscopy, 2054
- Normal and differential demasking flow-injection manifold for the direct spectrophotometric determination of zinc(II) in biological materials and pharmaceutical formulations, 2106
- Polymer-based analysis of a pharmaceutical preparation by NIR spectroscopy, 2311
- Spectrofluorimetric determination of moxifloxacin in tablets, human urine and serum, 2322
- PHASE ANALYSIS**
- Calcium carbonate phase analysis using XRD and FT-Raman spectroscopy, 251
- PHENOL**
- Laser activated voltammetry: application to the determination of phenol in aqueous solution at a glassy carbon electrode, 531
- Phenol substituent effects on electrogenerated chemiluminescence quenching, 545
- Identification and determination of the main constituents of phenol tar with carbon- and proton-NMR spectroscopy, 1331
- Derivatized spectrophotometry in the analysis of mixtures of phenols and herbicides, 2335
- PHENOLIC COMPOUND**
- Sample preparation in the determination of phenolic compounds in fruits, 989
- PHENYLALANINE**
- Chiral-discriminative amino acid films prepared by vacuum vaporization and/or plasma processing, 169
- PHENYLTINS**
- A quantitative extraction method for the determination of trace amounts of both butyl- and phenyltin compounds in sediments by gas chromatography-inductively coupled plasma mass spectrometry, 1757
- PHOSPHATE**
- A novel flow injection procedure for determination of phosphate in industrial raw phosphoric acid, 1211
- PHOSPHORESCENCE**
- An oxygen sensing system based on the phosphorescence quenching of metalloporphyrin thin film on alumina plates, 1601
- PHOSPHORIC ACID**
- A novel flow injection procedure for determination of phosphate in industrial raw phosphoric acid, 1211
- PHOSPHORIMETRY**
- Determination of thioguanine in pharmaceutical preparations by paper substrate room temperature phosphorimetry, 1327
- Single-use phosphorimetric sensor for the determination of nalidixic acid in human urine and milk, 2000
- PHOTODIODE ARRAY**
- Determination of three anabolic compounds in calf urine by liquid chromatography with photodiode-array detection, 2230
- PHOTOELECTROCHEMISTRY**
- Photoelectrochemistry as a novel strategy for DNA hybridization detection, 1908
- PHOTOGRAPHIC DEVELOPER SOLUTIONS**
- A capillary electrophoresis microchip for the analysis of photographic developer solutions using indirect fluorescence detection, 133
- PHOTIRRADIATION**
- Studies on metal-ion complex formation of crown ether derivatives incorporating a photoionizable spirobenzopyran moiety by electrospray ionization mass spectrometry, 1091
- PHOTOMETRY**
- Simultaneous separation of common mono- and divalent cations by ion chromatography with indirect photometric detection using an unmodified silica gel column and tyramine-oxalic acid-15-crown-5 as eluent, 269
- PHthalocyanines**
- Improvement of the synthesis of lutetium bisphthalocyanine using the Taguchi method, 341
- PIEZOELECTRIC SENSOR**
- Disposable, low cost, silver-coated, piezoelectric quartz crystal biosensor and electrode protection, 2268
- PIG**
- Piezoelectric quartz crystal based screening test for porcine reproductive and respiratory syndrome virus infection in pigs, 725
- PLASMA**
- Determination of 4-nonylphenol and 4-octylphenol in human blood samples by high-performance liquid chromatography with multi-electrode electrochemical coulometric-array detection, 1959
- Determination of trace selenium in human plasma and hair with ternary inclusion compound-fluorescent spectrophotometry, 2326
- PLATINUM**
- On-line preconcentration and separation of platinum using thiourea modified silica gel with microwave assisted desorption for FAAS determination, 1205
- POLARISATION**
- The application of fluorescence polarisation for the enhanced detection of

- green fluorescent protein (GFP) in the presence of cellular auto-fluorescence and other green fluorescent compounds, 499
- POLAROGRAPHY**
Resolution by polarographic techniques of atrazine-simazine and terbutryn-prometry binary mixtures by using PLS calibration and artificial neural networks, 909
- POLLUTANT**
Long-path FTIR spectroscopic studies of air pollutants in the Danube refinery plant, 1655
- POLY(ETHYLENE GLYCOL)**
HPLC-electrospray mass spectrometry for the analysis of temoporfin-poly(ethylene glycol) conjugates, 605
- POLY(ETHYLENE TEREPHTHALATE)**
Storage of natural water samples for total and reactive mercury analysis in PET bottles, 549
- POLY(VINYL CHLORIDE)**
A novel ethacrylic acid sensor based on a lanthanide porphyrin complex in a PVC matrix, 867
- POLYACRYLATE**
Determination of superabsorbent polyacrylate dust in workplace atmospheres after derivatization with ethanol and using HPLC with pulsed electrochemical detection, 1745
- POLYCYCLIC AROMATIC HYDROCARBONS**
Electrospray mass spectrometric determination of 1-nitropyrene and non-substituted polycyclic aromatic hydrocarbons using tropylium cation as a post-column HPLC reagent, 417
- Evaluation of anti-pyrene and anti-fluorene immunoabsorbent clean-up for PAHs from sludge and sediment reference materials followed by liquid chromatography and diode array detection, 1273
- Monofluorinated polycyclic aromatic hydrocarbons: characteristics and intended use in environmental analysis, 1699
- POLYHYDROXYALKALOIDS**
Electrospray and APCI analysis of polyhydroxyalkaloids using positive and negative collision induced dissociation experiments in a quadrupole ion trap, 1409
- POLYMER**
Preparation of single-stranded PCR products for electrospray ionization mass spectrometry using the DNA repair enzyme lambda exonuclease, 619
- Refractometric discrimination of void-space filling and swelling during vapour sorption in polymer films, 2173
- POLYMORPHISM**
Polymorphic analysis of a pharmaceutical preparation by NIR spectroscopy, 2311
- POLYOLS**
MALDI-MS and colorimetric analysis of diisocyanate and polyol migrants from model polyurethane adhesives used in food packaging, 115
- POLYPHENOLS**
Tetraethylammonium tetrafluoroborate: a novel electrolyte with a unique role in the capillary electrophoretic separation of polyphenols found in grape seed extracts, 1919
- Potential of the analytical pulse perturbation technique for the determination of polyphenols based on the Belousov-Zhabotinskii reaction, 2118
- POLYPROPYLENE**
Direct determination of a polymeric hindered amine light stabilizer in polypropylene by thermal desorption-gas chromatography assisted by in-line chemical reaction, 465
- POLYURETHANE**
Investigation of amine and polyol functionality in extracts of polyurethane wound management dressings using MALDI-MS, 111
- MALDI-MS and colorimetric analysis of diisocyanate and polyol migrants from model polyurethane adhesives used in food packaging, 115
- POTASSIUM**
The quantification of potassium using a quartz crystal microbalance, 1983
- POTENTIOMETRY**
Renewable pencil electrodes for highly sensitive stripping potentiometric measurements of DNA and RNA, 5
- Ultrapure water quality monitoring by a silicon-based potentiometric sensor, 175
- Electrochemical studies of complexation of Pb in red wines, 743
- Ionophores based on 1,3-dithiole-2-thione-4,5-dithiolate (DMIT) as potentiometric silver sensors, 861
- Multivariate standardization for correcting the ionic strength variation on potentiometric sensor arrays, 883
- Enzymatic determination of choline in milk using a FIA system with potentiometric detection, 1281
- Pulsed potentiometric detection in capillary electrophoresis using platinum electrodes, 1519
- Point-of-need diagnosis of cystic fibrosis using a potentiometric ion-selective electrode array, 2264
- Disposable potentiometric enzyme sensor for direct determination of organophosphorus insecticides, 2274
- PRECISION**
Recent trends in inter-laboratory precision at ppb and sub-ppb concentrations in relation to fitness for purpose criteria in proficiency testing, 385
- PRECONCENTRATION**
Synthesis of silica gel immobilized thiourea and its application to the on-line preconcentration and separation of silver, gold and palladium, 147
- Properties of chelating sorbents prepared by impregnation of LiChroprep RP-8 and LiChroprep RP-18 with ion pairs formed by Aliquat 336 and Nitroso-R-Salt, 297
- On-capillary ion-exchange preconcentration of inorganic anions using open-tubular capillaries followed by elution with a transient isotachophoretic gradient, 799
- Sequential injection spectrophotometric analysis of nitrite in natural waters using an on-line solid-phase extraction and preconcentration method, 943
- On-line preconcentration and separation of platinum using thiourea modified silica gel with microwave assisted desorption for FAAS determination, 1205
- Metal ion enrichment with Amberlite XAD-2 functionalized with Tiron: analytical applications, 1221
- PRINCIPAL COMPONENT ANALYSIS**
The authentication of olive oil on the basis of hydrocarbon concentration and composition, 97
- The generalized H-point standard-additions method to determine analytes present in two different chemical forms in unknown matrix samples Part II. Cr(vi) determination in water samples by absorption spectrophotometry, 777
- Evaluation of similarities between natural and accelerated browning of fino sherry wines by chemometric techniques, 1151
- Application of principal component regression to luminescence data for the screening of ciprofloxacin and enrofloxacin in animal tissues, 1155
- Principal component analysis and cluster analysis for the characterization of dental composites, 2044
- PROCESS ANALYSIS**
On-line monitoring and quantification of a process reaction by near-infrared spectroscopy. Catalysed esterification of butan-1-ol by acetic acid, 2059
- PROFICIENCY TESTING**
Recent trends in inter-laboratory precision at ppb and sub-ppb concentrations in relation to fitness for purpose criteria in proficiency testing, 385
- PROPRANOLOL**
Molecularly imprinted microparticles for capillary electrochromatographic enantiomer separation of propranolol, 1899
- PROPYLENE GLYCOL**
Non-invasive determination of ethanol, propylene glycol and water in a multi-component pharmaceutical oral liquid by direct measurement through amber plastic bottles using Fourier transform near-infrared spectroscopy, 2054
- PROTEASE**
Mathematical analysis for impedance change with proteolytic digestion of gelatin, 2289
- PROTEIN**
Probing protein-peptide-protein molecular architecture by atomic force microscopy and surface plasmon resonance, 245
- The application of fluorescence polarisation for the enhanced detection of green fluorescent protein (GFP) in the presence of cellular auto-fluorescence and other green fluorescent compounds, 499
- Determination of proteins in serum by fluorescence quenching of Rose Bengal using the stopped-flow mixing technique, 507
- A new type of reusable piezomimounosensor fabricated by a recombinant IgG-binding protein, 669
- The high-sensitivity determination of protein concentrations by the enhancement of Rayleigh light scattering of Arsenazo-DBN, 1483
- A fluorescent-labeled oligopeptide for monitoring PKA-mediated phosphorylation, 1905
- PROTON ANALYSIS**
Automated *in situ* preparation of Azomethine-H and the subsequent determination of boron in fertilizer process and water effluent streams with sequential injection analysis, 2094
- PULSED FLOW**
Pulsed flow chemistry: a new approach to solution handling for flow analysis coupled with chemiluminescence detection, 1869
- PURIFICATION**
A comparative study on methods of optimal sample preparation for the analysis of oligonucleotides by matrix-assisted laser desorption/ionization mass spectrometry, 575
- QUADRUPOLE**
Electrospray and APCI analysis of polyhydroxyalkaloids using positive and negative collision induced dissociation experiments in a quadrupole ion trap, 1409
- QUALITY ASSURANCE**
Towards a unified model of errors in analytical measurement, 2020
- QUARTZ CRYSTAL MICROBALANCE**
Anomalous behaviour of the quartz crystal microbalance in the presence of electrolytes, 785
- The quantification of potassium using a quartz crystal microbalance, 1983
- QUENCHING**
Determination of proteins in serum by fluorescence quenching of Rose Bengal using the stopped-flow mixing technique, 507

RAMAN SPECTROSCOPY

Rapid analysis of ecstasy and related phenethylamines in seized tablets by Raman spectroscopy, 541
Composition profiling of seized ecstasy tablets by Raman spectroscopy, 1811

REAGENT

Study on the fluorescent 'on-off' properties of benzofurazan compounds bearing an aromatic substituent group and design of fluorescent 'on-off' derivatization reagents, 1839

REFRACTOMETRY

Refractometric discrimination of void-space filling and swelling during vapour sorption in polymer films, 2173

REMOTE FLOW CELL

A remote flow cell for UV absorbance detection with capillary HPLC based on a single strand fiber optic, 1061

RESERPINE

Chemiluminometric determination of reserpine and related alkaloids, 1307

RESIN

The ion chromatographic separation of high valence metal cations using a neutral polystyrene resin dynamically modified with dipicolinic acid, 2157

REVERSE MICELLE SYSTEM

Chemiluminescence determination of iodide and/or iodine using a luminol-hexadecyltrimethylammonium chloride reversed micelle system following on-line oxidation and extraction, 759

REVIEW

Bio-inorganic speciation analysis by hyphenated techniques, 963
Sample preparation in the determination of phenolic compounds in fruits, 989

Novel flow injection methods for drug-receptor interaction studies, based on probing cell metabolism, 1889
Introduction to multivariate calibration in analytical chemistry, 2125

RIBOFLAVIN

Determination of thiamine and riboflavin in pet foods and animal feedstuffs, 353

SACCHARIDES

Determination of saccharides in wastewater from the beverage industry by microdialysis sampling, microbore high performance anion exchange chromatography and integrated pulsed electrochemical detection, 1379

SAMPLE HANDLING

Storage of natural water samples for total and reactive mercury analysis in PET bottles, 549

Microwave assisted process for methidathion in water samples for physicochemical studies, 1199

Application of sample pre-oxidation of arsenite in human urine prior to speciation via on-line photo-oxidation with membrane hydride generation and ICP-MS detection, 1215

Metal ion enrichment with Amberlite XAD-2 functionalized with Tiron: analytical applications, 1221

Dry purge for the removal of water from the solid sorbents used to sample volatile organic compounds from the atmospheric air, 2112

A robust multisyringe system for process flow analysis Part II. A multi-commuted injection system applied to the photometric determination of free acidity and iron(II) in metallurgical solutions, 2364

SAMPLE PREPARATION

Extracting syringe—connecting sample preparation and gas chromatography, 673

The influence of variations in atmospheric pressure on the uncertainty budget of weighing results, 959

Sample preparation in the determination of phenolic compounds in fruits, 989

Evaluation of anti-pyrene and anti-fluorene immunosorbent clean-up for PAHs from sludge and sediment reference materials followed by liquid chromatography and diode array detection, 1273

Determination of cocaine and heroin vapor pressures using commercial and illicit samples, 1393

Fusion method for preparation of refractory nickel based alloy powders for X-ray fluorescence spectrometry, 1681

SAMPLING

Collaborative trial in sampling for the spatial delineation of contamination and the estimation of uncertainty, 139

Sampling procedures for intrinsically valid volatile organic compound measurements, 825

Determination of airborne methyl isocyanate as dibutylamine or 1-(2-methoxyphenyl)piperazine derivatives by liquid and gas chromatography, 1949

Sampling proficiency test for the estimation of uncertainty in the spatial delineation of contamination, 2026

Determination of arsenic in sediment and soil slurries by electrothermal atomic absorption spectrometry using W-Rh permanent modifier, 2079

Direct analysis of silicon carbide by fluorination assisted electrothermal vaporization inductively coupled plasma atomic emission spectrometry using a slurry sampling technique, 2089

SAPONINS

Characterization of ginseng saponins using electrospray mass

spectrometry and collision-induced dissociation experiments of metal-attachment ions, 591

SCAMPI

Nitrogen factor for *Nephrops norvegicus* (scampi), 347

SCANNING ELECTROCHEMICAL MICROSCOPY

Simple procedure for the fabrication of silver/silver chloride potentiometric electrodes with micrometre and smaller dimensions: application to scanning electrochemical microscopy, 889

SCANNING PROBE MICROSCOPY

Molecular imprinted microparticles for capillary electrochromatographic enantiomer separation of propranolol, 1899

SEA-WATER

Determination of cobalt and iron in estuarine and coastal waters using flow injection with chemiluminescence detection, 51

Strategies for solving matrix effects in the analysis of triphenyltin in sea-water samples by three-way multivariate curve resolution, 2038

SEDIMENTS

Evaluation of anti-pyrene and anti-fluorene immunosorbent clean-up for PAHs from sludge and sediment reference materials followed by liquid chromatography and diode array detection, 1273

A quantitative extraction method for the determination of trace amounts of both butyl- and phenyltin compounds in sediments by gas chromatography-inductively coupled plasma mass spectrometry, 1757

Determination of arsenic in sediment and soil slurries by electrothermal atomic absorption spectrometry using W-Rh permanent modifier, 2079

Optimisation of tin determination in *aqua regia*-HF extracts from sediments by electrothermal atomic absorption spectrometry using experimental design, 2084

SELECTIVITY MODULATION

Modulation of the separation selectivity of inorganic anions in electrostatic ion chromatography using acidic eluents, 241

SELENIUM

Selenium speciation in enriched and natural samples by HPLC-ICP-MS and HPLC-ESI-MS with perfluorinated carboxylic acid ion-pairing agents, 71

Feasibility study of ion-chromatography microwave assisted on-line species conversion hydride generation atomic absorption spectrometry for selenium speciation analysis of biological material, 273

Development of chiral HPLC for selenoamino acids with ICP-MS detection: application to selenium nutritional supplements, 281

Focused microwave Soxhlet device for rapid extraction of mercury, arsenic and selenium from coal prior to atomic fluorescence detection, 317

Determination of trace selenium in human plasma and hair with ternary inclusion compound-fluorescent spectrophotometry, 2326

SENNOSIDE A

Production of monoclonal antibody against a major purgative component, sennoside A, its characterization and ELISA, 1109

SENSOR

Discrimination of chemically similar organic vapours and vapour mixtures using the Kohonen network, 65

A novel electrochemical microsensor for the determination of NO and its application to the study of the NO donor S-nitrosoglutathione, 163

Chiral-discriminative amino acid films prepared by vacuum vaporization and/or plasma processing, 169

Ultrapure water quality monitoring by a silicon-based potentiometric sensor, 175

Iron(III) ionophores based on formylsalicylic acid derivatives as sensors for ion-selective electrodes, 179

Fluorescent optode membrane based on organogel for humidity sensing, 301

Discrimination and quantification of flammable gases with a SnO₂ sniffing sensor, 517

A novel optical oxygen sensing system based on triplet-triplet reflectance of fullerene C₆₀-polystyrene film by time-resolved spectroscopy using diffuse reflectance laser flash photolysis, 523

A new type of reusable piezooimmunosensor fabricated by a recombinant IgG-binding protein, 669

The use of a remote stripping sensor for the determination of copper and mercury in the Lagoon of Venice, 731

Luminol electrochemiluminescence with screen-printed electrodes for low-cost disposable oxidase-based optical sensors, 789

Ionophores based on 1,3-dithiole-2-thione-4,5-dithiolate (DMIT) as potentiometric silver sensors, 861

A novel ethacrynic acid sensor based on a lanthanide porphyrin complex in a PVC matrix, 867

Optical oxygen sensing based on the luminescence change of metalloporphyrins immobilized in styrene-pentafluorostyrene copolymer film, 871

A renewable liquid drop sensor for di- or trinitrophenol based on fluorescence quenching of 3,3',5,5'-tetramethylbenzidine dihydrochloride, 877

Multivariate standardization for correcting the ionic strength variation on potentiometric sensor arrays, 883

On-line determination of non-volatile or low-concentration metabolites in a yeast cultivation using an electronic nose, 1123

Ratiometric oxygen sensing: detection of dual-emission ratio through a single emission filter, 1175

- Renewable-surface amperometric nitrite sensor based on sol-gel-derived silicomolybdate-methylsilicate-graphite composite material, 1291
- Integration of impedance sensors in thin layer chromatographic plates, 1375
- Measurement of nitric oxide released in the rat heart with an amperometric microsensor, 1435
- Development of an iodine sensor based on fluorescence energy transfer, 1441
- An oxygen sensing system based on the phosphorescence quenching of metalloporphyrin thin film on alumina plates, 1601
- Temperature and humidity compensation in the determination of solvent vapors with microsensor system, 1775
- Relationship between theoretical oxygen demand and photocatalytic chemical oxygen demand for specific classes of organic chemicals, 1915
- Phasor transform to extract glucose and ascorbic acid data in an amperometric sensor, 1987
- Fluorimetric flow injection and flow-through sensing systems for cyanide control in waste water, 2100
- A dual electrochemical sensor for nitrite and nitric oxide, 2169
- Disposable potentiometric enzyme sensor for direct determination of organophosphorus insecticides, 2274
- Bismetallocporphyrin-based ISE sensitive to fluoroborate, 2285
- SEQUENTIAL INJECTION**
- Sequential injection spectrophotometric analysis of nitrite in natural waters using an on-line solid-phase extraction and preconcentration method, 943
- Automated *in situ* preparation of Azomethine-H and the subsequent determination of boron in fertilizer process and water effluent streams with sequential injection analysis, 2094
- SERUM**
- Determination of proteins in serum by fluorescence quenching of Rose Bengal using the stopped-flow mixing technique, 507
- Development of an electrochemical ELISA for the screening of 17 β -estradiol and application to bovine serum, 1419
- The high-sensitivity determination of protein concentrations by the enhancement of Rayleigh light scattering of Arsenazo-DBN, 1483
- Terbium-sensitized luminescence determination of levofloxacin in tablets and human urine and serum, 1851
- Determination of 4-nonylphenol and 4-octylphenol in human blood samples by high-performance liquid chromatography with multi-electrode electrochemical coulometric-array detection, 1959
- Binding patterns of co-existing aluminium and iron to human serum transferrin studied by HPLC-high resolution ICP-MS, 1962
- Spectrofluorimetric determination of moxifloxacin in tablets, human urine and serum, 2322
- SEWAGE SLUDGE**
- Evaluation of anti-pyrene and anti-fluorene immunosorbent clean-up for PAHs from sludge and sediment reference materials followed by liquid chromatography and diode array detection, 1273
- Comparison between sequential extraction procedures and single extractions for metal partitioning in sewage sludge samples, 1353
- Determination of non-ionic surfactants and polar degradation products in influent and effluent water samples and sludges of sewage treatment plants by a generic solid-phase extraction protocol, 1733
- Determination of hexavalent chromium in lime-treated sewage sludge by anion-exchange fast protein liquid chromatography with electrothermal atomic absorption spectrometry detection, 1938
- SHPOLSKII SPECTROSCOPY**
- Monofluorinated polycyclic aromatic hydrocarbons: characteristics and intended use in environmental analysis, 1699
- SILICON**
- Determination of boron in uniformly-doped silicon thin films by isotope dilution inductively coupled plasma mass spectrometry, 493
- SILVER**
- The measurement of silver in road salt by electrothermal atomic absorption spectrometry, 123
- Synthesis of silica gel immobilized thiourea and its application to the on-line preconcentration and separation of silver, gold and palladium, 147
- Determination of silver in photographic emulsion: comparison of traditional solid-state electrodes and a new ion-selective membrane electrode, 1447
- Comparative study of electrothermal atomic absorption spectrometric methods for the determination of silver in used lubricating oils, 1673
- SIZE-EXCLUSION CHROMATOGRAPHY**
- Speciation of Cu, Fe and Mn in beer using ion exchange separation and size-exclusion chromatography in combination with electrothermal atomic absorption spectrometry, 1933
- Metal distribution patterns in the mussel *Mytilus edulis* cytosols using size-exclusion chromatography and double focusing ICP-MS detection, 2223
- SLURRY**
- Direct analysis of silicon carbide by fluorination assisted electrothermal vaporization inductively coupled plasma atomic emission spectrometry using a slurry sampling technique, 2089
- SLURRY ANALYSIS**
- Size-elemental characterization of suspended particle matter by split-flow thin cell fractionation and slurry analysis-electrothermal atomic absorption spectrometry, 1335
- SLURRY SAMPLING**
- Determination of lead in fish samples by slurry sampling electrothermal atomic absorption spectrometry, 1491
- SOFTWARE CONTROL**
- A robust multisyringe system for process flow analysis Part II. A multi-commuted injection system applied to the photometric determination of free acidity and iron(III) in metallurgical solutions, 2364
- SOIL**
- Collaborative trial in sampling for the spatial delineation of contamination and the estimation of uncertainty, 139
- MultiSimplex optimisation of purge-and-trap extraction of volatile organic compounds in soil samples, 477
- Determination of pesticides in soil samples by supercritical fluid chromatography-atmospheric pressure chemical ionisation mass spectrometric detection, 1751
- Development of a wide bore flow through microwave digestion device for the determination of trace metals in soil, 1875
- Determination of arsenic in sediment and soil slurries by electrothermal atomic absorption spectrometry using W-Rh permanent modifier, 2079
- Disposable potentiometric enzyme sensor for direct determination of organophosphorus insecticides, 2274
- SOL-GEL**
- A glucose biosensor with enzyme-entrapped sol-gel and an oxygen-sensitive optode membrane, 157
- Optical biosensing of nitrite ions using cytochrome *c*₁ nitrite reductase encapsulated in a sol-gel matrix, 1993
- SOLID PHASE EXTRACTION**
- Retention of carbaryl by polyether type polyurethane foam: a critical study, 257
- Solid phase microextraction (SPME): a new procedure for the control of butyl- and phenyltin pollution in the environment by GC-FPD, 263
- Chromium speciation analysis by solid-phase extraction on a high surface area TiO₂, 693
- Determination of mercapturic acids in urine by solid-phase extraction followed by liquid chromatography-electrospray ionization mass spectrometry, 715
- Sequential injection spectrophotometric analysis of nitrite in natural waters using an on-line solid-phase extraction and preconcentration method, 943
- Solid-phase extraction and spectrophotometric determination of hydrogen sulfide in air and water utilizing ethylene blue formation, 1185
- Efficient sample pre-concentration of bupivacaine from human plasma by solid-phase extraction on molecularly imprinted polymers, 1515
- Clean-up, detection and determination of salbutamol in human urine and serum, 1569
- On-line concentration in micellar electrokinetic chromatography for triazine determination in water samples: evaluation of three different stacking modes, 1725
- Determination of non-ionic surfactants and polar degradation products in influent and effluent water samples and sludges of sewage treatment plants by a generic solid-phase extraction protocol, 1733
- Description and validation of an analytical method for the determination of paromomycin sulfate in medicated animal feeds, 1955
- SOLID PHASE MICROEXTRACTION**
- Solid phase microextraction of inorganic anions based on polypyrrole film, 391
- Direct coupling of microcolumn liquid chromatography with in-tube solid-phase microextraction for the analysis of antidepressant drugs, 807
- Automated in-tube solid phase microextraction coupled with HPLC-ES-MS for the determination of catechins and caffeine in tea, 2216
- SOLUTE DESCRIPTOR**
- Chromatographic methods for the determination of the log₁₀ solute descriptor, 2180
- SOLVENT**
- Temperature and humidity compensation in the determination of solvent vapors with a microsensor system, 1775
- SOLVENT MICROEXTRACTION**
- Development of a rapid screening technique for organochlorine pesticides using solvent microextraction (SME) and fast gas chromatography (GC), 1943
- SORBENT**
- Retention of carbaryl by polyether type polyurethane foam: a critical study, 257
- Properties of chelating sorbents prepared by impregnation of LiChroprep RP-8 and LiChroprep RP-18 with ion pairs formed by Aliquat 336 and Nitroso-R-Salt, 297
- Optimization of a new activated carbon based sorbent for on-line preconcentration and trace determination of nickel in aquatic samples using mixed-level orthogonal array design, 1649
- SOXHLET EXTRACTION**
- Focused microwave Soxhlet device for rapid extraction of mercury, arsenic and selenium from coal prior to atomic fluorescence detection, 317

SPECIATION

- Selenium speciation in enriched and natural samples by HPLC-ICP-MS and HPLC-ESI-MS with perfluorinated carboxylic acid ion-pairing agents, 71
 Comparison of biota sample pretreatments for arsenic speciation with coupled HPLC-HG-ICP-MS, 401
 Chromium speciation analysis by solid-phase extraction on a high surface area TiO_2 , 693
 Determination of mercury species by capillary zone electrophoresis-inductively coupled plasma mass spectrometry: a comparison of two spray chamber-nebulizer combinations, 705
 Use of perchloric acid as a reaction medium for speciation of arsenic by hydride generation-atomic absorption spectrometry, 949
 Bio-inorganic speciation analysis by hyphenated techniques, 963
 Studies on the speciation of inorganic and organic antimony compounds in airborne particulate matter by HPLC-ICP-MS, 1025
 Group speciation of metal dithiocarbamates by sorption on C_{60} fullerene, 1495

SPECTROFLUORIMETRY

- Extractive fluorimetric determination of malathion residues in water samples, 323
 Quantum dot-labeled trichosanthin, 1029
 Use of partial least-squares regression for multicomponent determinations based on kinetic spectrofluorimetric data. Simultaneous determination of canrenone and spironolactone in urine, 1159
 Trace determination of carbendazim, fuberidazole and thiabendazole in water by application of multivariate calibration to cross-sections of three-dimensional excitation-emission matrix fluorescence, 1167
 Application of artificial neural networks for the simultaneous determination of a mixture of fluorescent dyes by synchronous fluorescence, 2049
 Spectrofluorimetric determination of moxifloxacin in tablets, human urine and serum, 2322

SPECTROPHOTOMETRY

- MALDI-MS and colorimetric analysis of diisocyanate and polyol migrants from model polyurethane adhesives used in food packaging, 115
 Direct spectrophotometric determination of aluminium oxide in Portland cement and cement clinker. An insight into the solution equilibria and analytical aspects of the aluminium-quinizarin system, 221
 Major sensitivity improvements in ion chromatography determinations involving post-column spectrophotometric reaction detectors through elimination of pump noise using a dual wavelength monitoring procedure, 803
 Specific spectrophotometric determination of hydrocyanic acid in the environment, 939
 Sequential injection spectrophotometric analysis of nitrite in natural waters using an on-line solid-phase extraction and preconcentration method, 943
 Fast urinary screening for paracetamol using on-line microwave assisted hydrolysis and spectrophotometric detection, 1179

- Solid-phase extraction and spectrophotometric determination of hydrogen sulfide in air and water utilizing ethylene blue formation, 1185
 Simultaneous determination of dihydroxybenzenes, aminophenols and phenylenediamines in hair dyes by high-performance liquid chromatography on hypercross-linked polystyrene, 1249
 Multisyringe flow system: determination of sulfur dioxide in wines, 1501
 Determination of sulfide in waters by flow-injection solid phase spectrophotometry, 1835

- Normal and differential demasking flow-injection manifold for the direct spectrophotometric determination of zinc(II) in biological materials and pharmaceutical formulations, 2106
 Determination of trace selenium in human plasma and hair with ternary inclusion compound-fluorescent spectrophotometry, 2326
 A robust multisyringe system for process flow analysis Part II. A multi-commuted injection system applied to the photometric determination of free acidity and iron(III) in metallurgical solutions, 2364

SPECTROSCOPY

- Calcium carbonate phase analysis using XRD and FT-Raman spectroscopy, 251
 Determination of arsenic in biological fluids by electrothermal atomic absorption spectrometry, 313
 Long-path FTIR spectroscopic studies of air pollutants in the Danube refinery plant, 1655
 Flow injection-FTIR determination of dithiocarbamate pesticides, 1829
 Application of artificial neural networks for the simultaneous determination of a mixture of fluorescent dyes by synchronous fluorescence, 2049

SPLINE WAVELET SELF-CONVOLUTION

- Spline wavelet self-convolution in processing overlapped peaks in capillary electrophoresis, 1303

STANDARD ADDITIONS

- The generalized H-point standard-additions method to determine analytes present in two different chemical forms in unknown matrix samples Part I. General considerations, 771

STARCH

- On-line monitoring of starch enzymatic hydrolysis by near-infrared spectroscopy, 749

STATISTICS

- Spline wavelet self-convolution in processing overlapped peaks in capillary electrophoresis, 1303
 Estimation of precision and efficiency mass transfer steps for the determination of pesticides in vegetables aiming at the expression of results with reliable uncertainty, 1459
 Sampling proficiency test for the estimation of uncertainty in the spatial delineation of contamination, 2026

STEROID

- Determination of steroid hormones by membrane inlet mass spectrometry and desorption chemical ionization, 1577
 Enzymatic hydrolysis of conjugated steroid metabolites: search for optimum conditions using response surface methodology, 2255

STOPPED FLOW

- Determination of proteins in serum by fluorescence quenching of Rose Bengal using the stopped-flow mixing technique, 507

STREPTAVIDIN

- Probing protein-peptide-protein molecular architecture by atomic force microscopy and surface plasmon resonance, 245

STYRENE

- Determination of styrene and styrene additives using cylindrical microelectrodes in acetone, 2006

SUBCRITICAL WATER EXTRACTION

- An approach to the static-dynamic subcritical water extraction of laurel essential oil: comparison with conventional techniques, 481

SULFADIAZINE

- Determination and quantification of sulfadiazine and trimethoprim in swine tissues using liquid chromatography with ultraviolet and mass spectrometric detection, 409

- Biosensor assay of sulfadiazine and sulfamethazine residues in pork, 1771

SULFAMETHAZINE

- Biosensor assay of sulfadiazine and sulfamethazine residues in pork, 1771

SULFIDE

- Solid-phase extraction and spectrophotometric determination of hydrogen sulfide in air and water utilizing ethylene blue formation, 1185

- Determination of sulfide in waters by flow-injection solid phase spectrophotometry, 1835

SULFUR

- Determination of trace elemental sulfur and hydrogen sulfide in petroleum and its distillates by preliminary extraction with voltammetric detection, 903

SULFUR DIOXIDE

- Multisyringe flow system: determination of sulfur dioxide in wines, 1501

SUPERCRITICAL FLUID CHROMATOGRAPHY

- Enantioselective supercritical fluid chromatography using Ristocetin A chiral stationary phases, 1037

- Determination of sulfonamides by packed column supercritical fluid chromatography with atmospheric pressure chemical ionisation mass spectrometric detection, 1243

- Determination of pesticides in soil samples by supercritical fluid chromatography-atmospheric pressure chemical ionisation mass spectrometric detection, 1751

SUPERCRITICAL FLUID EXTRACTION

- Development of an automated method for determining oil in water by direct aqueous supercritical fluid extraction coupled on-line with infrared spectroscopy, 2356

SURFACE ENERGY

- Surface energy and the response of transverse acoustic wave devices in liquids, 1525

SURFACE PLASMON EXCITATION

- Surface plasmon enhanced fluorescence measurement on flat and constructed gold surfaces, 535

SURFACE PLASMON RESONANCE

- Probing protein-peptide-protein molecular architecture by atomic force microscopy and surface plasmon resonance, 245

SURFACTANT

- Simultaneous determination of cationic and nonionic surfactants in consumer products by use of mixed aggregate-based methodology, 1507

- Determination of non-ionic surfactants and polar degradation products in influent and effluent water samples and sludges of sewage treatment plants by a generic solid-phase extraction protocol, 1733

SUSPENDED PARTICULATES

- Size-elemental characterization of suspended particle matter by split-flow thin cell fractionation and slurry analysis-electrothermal atomic absorption spectrometry, 1335

TAGUCHI METHOD

- Improvement of the synthesis of lutetium bisphthalocyanine using the Taguchi method, 341

TANDEM MASS SPECTROMETRY

- Structural analysis of drug-DNA adducts by tandem mass spectrometry, 627

- Detection of diazepam in horse hair samples by mass spectrometric methods, 1765

- Simultaneous quantitative determination of norgestrel and progesterone in human serum by high-performance liquid chromatography-tandem

- mass spectrometry with atmospheric pressure chemical ionization, 2201
- TAR**
Identification and determination of the main constituents of phenol tar with carbon- and proton-NMR spectroscopy, 1331
- TEA**
HPLC determination of catechins and caffeine in tea. Differentiation of green, black and instant teas, 421
- Visual fluorimetry of trace aluminium by specific immobilization with α,ω -dihydroxyazobenzene on an octadecylsilanized silica thin layer, 1667
- Automated in-tube solid phase microextraction coupled with HPLC-ES-MS for the determination of catechins and caffeine in tea, 2216
- TEMOPORFIN**
HPLC-electrospray mass spectrometry for the analysis of temoporfin-poly(ethylene glycol) conjugates, 605
- THERMAL DESORPTION**
Direct determination of a polymeric hindered amine light stabilizer in polypropylene by thermal desorption-gas chromatography assisted by in-line chemical reaction, 465
- THERMAL IONISATION**
Use and analysis by thermal ionisation mass spectrometry of ^{26}Mg and ^{41}K to assess mineral uptake in Scots pine (*Pinus sylvestris* L.), 487
- THERMODYNAMICS**
The thermodynamic properties of methanol-water association and its effect on solute retention in liquid chromatography, 1543
- THIABENDAZOLE**
Trace determination of carbendazim, fuberidazole and thiabendazole in water by application of multivariate calibration to cross-sections of three-dimensional excitation-emission matrix fluorescence, 1167
- THIN FILM**
Determination of boron in uniformly-doped silicon thin films by isotope dilution inductively coupled plasma mass spectrometry, 493
- THIN LAYER CHROMATOGRAPHY**
Integration of impedance sensors in thin layer chromatographic plates, 1375
- THIOCYANATE**
Indirect determination of thiocyanate with ammonium sulfate and ethanol by extraction-flotation of copper, 1885
- THIOGUANINE**
Determination of thioguanine in pharmaceutical preparations by paper substrate room temperature phosphorimetry, 1327
- THIOL**
Selective determination of thiols: a novel electroanalytical approach, 661
- TIME-RESOLVED SPECTROSCOPY**
A novel optical oxygen sensing system based on triplet-triplet reflectance of fullerene C₆₀-polystyrene film by time-resolved spectroscopy using diffuse reflectance laser flash photolysis, 523
- TIN**
Determination of trace tin in flow systems at an epoxy-carbon powder-8-hydroxyquinoline composite electrode, 895
- Optimisation of tin determination in *aqua regia*-HF extracts from sediments by electrothermal atomic absorption spectrometry using experimental design, 2084
- TITANIUM DIOXIDE**
Determination of titanium dioxide in foods using inductively coupled plasma optical emission spectrometry, 2339
- TTTRIMETRY**
Precipitation titrations using an automatic titrator based on a multicommutated unsegmented flow system, 333
- Carbonate removal from concentrated hydroxide solutions, 955
- Multivariate analysis of reagent profiles for slow reactions using PLS analysis, 1709
- TRACE ANALYSIS**
Trace element determination of single fluid inclusions by laser ablation ICP-MS: applications for halites from sedimentary basins, 205
- Metal ion enrichment with Amberlite XAD-2 functionalized with Tiron: analytical applications, 1221
- Visual fluorimetry of trace aluminium by specific immobilization with α,ω -dihydroxyazobenzene on an octadecylsilanized silica thin layer, 1667
- Development of a wide bore flow through microwave digestion device for the determination of trace metals in soil, 1875
- TRANSFERRIN**
Renewable amperometric immunosensor based on paraffin-graphite-transferrin antiserum biocomposite for transferrin assay, 1595
- Binding patterns of co-existing aluminium and iron to human serum transferrin studied by HPLC-high resolution ICP-MS, 1962
- TRANSVERSE ACOUSTIC WAVE DEVICE**
Surface energy and the response of transverse acoustic wave devices in liquids, 1525
- TRAP AND RELEASE MEMBRANE INTRODUCTION**
Trace level analysis of VOCs and semi-VOCs in aqueous solution using a direct insertion membrane probe and trap and release membrane introduction mass spectrometry, 21
- TRIAZINES**
On-line concentration in micellar electrokinetic chromatography for triazine determination in water samples: evaluation of three different stacking modes, 1725
- TRIMETHOPRIM**
Determination and quantification of sulfadiazine and trimethoprim in swine tissues using liquid chromatography with ultraviolet and mass spectrometric detection, 409
- TRINITROPHENOL**
A renewable liquid drop sensor for di- or trinitrophenol based on fluorescence quenching of 3,3',5,5'-tetramethylbenzidine dihydrochloride, 877
- TRIPHENYLtin**
Strategies for solving matrix effects in the analysis of triphenyltin in sea-water samples by three-way multivariate curve resolution, 2038
- ULTRAVIOLET-VISIBLE SPECTROPHOTOMETRY**
Evaluation of analytical instrumentation. Part XIII. Instrumentation for UV-visible-NIR spectrometry, 367
- The generalized H-point standard-additions method to determine analytes present in two different chemical forms in unknown matrix samples Part II. Cr(VI) determination in water samples by absorption spectrophotometry, 777
- Estimation of trace amounts of benzene in solvent-extracted vegetable oils and oil seed cakes, 1687
- UNCERTAINTY**
Sampling proficiency test for the estimation of uncertainty in the spatial delineation of contamination, 2026
- UNCERTAINTY BUDGET**
The influence of variations in atmospheric pressure on the uncertainty budget of weighing results, 959
- URANIUM**
Application of artificial neural networks coupled with an orthogonal design and optimization algorithms to multifactor optimization of a new FIA system for the determination of uranium(VI) in ore samples, 921
- URINE**
High-performance liquid chromatography and inductively coupled plasma mass spectrometry (HPLC-ICP-MS) for the analysis of xenobiotic metabolites in rat urine: application to the metabolites of 4-bromoaniline, 235
- A microtitre plate assay for the detection of antibiotics in porcine urine, 395
- Application of sample pre-oxidation of arsenite in human urine prior to speciation via on-line photo-oxidation with membrane hydride generation and ICP-MS detection, 1215
- Differential pulse voltammetric indirect determination of aluminium in drinking waters, blood, urine, hair, and medicament samples using L-dopa under alkaline conditions, 1299
- The high-sensitivity determination of protein concentrations by the enhancement of Rayleigh light scattering of Arsenazo-DBN, 1483
- Adsortive stripping voltammetric determination of ketoconazole in pharmaceutical preparations and urine using carbon paste electrodes, 1639
- Terbium-sensitized luminescence determination of levofloxacin in tablets and human urine and serum, 1851
- Single-use phosphorimetric sensor for the determination of nalidixic acid in human urine and milk, 2000
- Spectrofluorimetric determination of moxifloxacin in tablets, human urine and serum, 2322
- VACUUM VAPORIZATION**
Chiral-discriminative amino acid films prepared by vacuum vaporization and/or plasma processing, 169
- VALIDATION**
Meeting the International Conference on Harmonisation's Guidelines on Validation of Analytical Procedures: Quantification as exemplified by a near-infrared reflectance assay of paracetamol in intact tablets, 1341
- Introduction to multivariate calibration in analytical chemistry, 2125
- VAPOUR SORPTION**
Refractometric discrimination of void-space filling and swelling during vapour sorption in polymer films, 2173
- VEGETABLE**
Selenium speciation in enriched and natural samples by HPLC-ICP-MS and HPLC-ESI-MS with perfluorinated carboxylic acid ion-pairing agents, 71
- Estimation of precision and efficiency mass transfer steps for the determination of pesticides in vegetables aiming at the expression of results with reliable uncertainty, 1459
- VEGETABLE OIL**
Estimation of trace amounts of benzene in solvent-extracted vegetable oils and oil seed cakes, 1687
- VETERINARY**
Determination of thiamine and riboflavin in pet foods and animal feedingstuffs, 353
- A rapid method for the determination of lasalocid in animal tissues and eggs by high performance liquid chromatography with fluorescence detection and confirmation by LC-MS-MS, 2196
- VOLATILE ORGANIC COMPOUNDS**
Trace level analysis of VOCs and semi-VOCs in aqueous solution using a direct insertion membrane probe and trap and release membrane introduction mass spectrometry, 21

- Sorption of volatile organics from water using an open-tubular, wall-coated capillary column, 469
- MultiSimplex optimisation of purge-and-trap extraction of volatile organic compounds in soil samples, 477
- Sampling procedures for intrinsically valid volatile organic compound measurements, 825
- Dry purge for the removal of water from the solid sorbents used to sample volatile organic compounds from the atmospheric air, 2112
- VOLTAMMETRY**
- A novel electrochemical microsensor for the determination of NO and its application to the study of the NO donor *S*-nitrosoglutathione, 163
- Laser activated voltammetry: application to the determination of phenol in aqueous solution at a glassy carbon electrode, 531
- Competitive assay of 2,4-dichlorophenoxyacetic acid using a polymer imprinted with an electrochemically active tracer closely related to the analyte, 665
- Electrochemical studies of complexation of Pb in red wines, 743
- Determination of trace tin in flow systems at an epoxy-carbon powder-8-hydroxyquinoline composite electrode, 895
- Determination of trace elemental sulfur and hydrogen sulfide in petroleum and its distillates by preliminary extraction with voltammetric detection, 903
- A study of the preconcentration and stripping voltammetry of Pb(II) at carbon electrodes, 1135
- Electrochemical impedance study and sensitive voltammetric determination of Pb(II) at electrochemically activated glassy carbon electrodes, 1139
- Voltammetric measurements of the interaction of metal complexes with nucleic acids, 1791
- Determination of styrene and styrene additives using cylindrical microelectrodes in acetone, 2006
- Electrochemical oxidation at carbon paste electrode of tacrine and 1-hydroxytacrine and differential pulse voltammetric determination of tacrine in pharmaceuticals and human urine, 2016
- Alloy electrodes with high hydrogen overvoltage for analytical use in voltammetry. Some preliminary results, 2163
- WATER**
- Determination of cobalt and iron in estuarine and coastal waters using flow injection with chemiluminescence detection, 51
- Determination of carbon-14 levels in heavy water and groundwaters, 59
- Ultrapure water quality monitoring by a silicon-based potentiometric sensor, 175
- Retention of carbaryl by polyether type polyurethane foam: a critical study, 257
- Extractive fluorimetric determination of malathion residues in water samples, 323
- Determination of carbonyl compounds in waters using triazine-based hydrazine reagents and liquid chromatography, 433
- Sorption of volatile organics from water using an open-tubular, wall-coated capillary column, 469
- Storage of natural water samples for total and reactive mercury analysis in PET bottles, 549
- The use of a remote stripping sensor for the determination of copper and mercury in the Lagoon of Venice, 731
- The generalized H-point standard-additions method to determine analytes present in two different chemical forms in unknown matrix samples Part II. Cr(VI) determination in water samples by absorption spectrophotometry, 777
- Resolution by polarographic techniques of atrazine-simazine and terbutryn-prometryn binary mixtures by using PLS calibration and artificial neural networks, 909
- Specific spectrophotometric determination of hydrocyanic acid in the environment, 939
- Sequential injection spectrophotometric analysis of nitrite in natural waters using an on-line solid-phase extraction and preconcentration method, 943
- Continuous and simultaneous determination of anions and cations in rainwater by ion chromatography, 1065
- Determination of haloacetic acids in water by liquid chromatography-electrospray ionization-mass spectrometry using volatile ion-pairing reagents, 1097
- Trace determination of carbendazim, fuberidazole and thiabendazole in water by application of multivariate calibration to cross-sections of three-dimensional excitation-emission matrix fluorescence, 1167
- Solid-phase extraction and spectrophotometric determination of hydrogen sulfide in air and water utilizing ethylene blue formation, 1185
- Flow injection-liquid chromatography-cold vapour atomic absorption spectrometry for rapid determination of methyl and inorganic mercury, 1193
- Microwave assisted process for methidathion in water samples for physicochemical studies, 1199
- Metal ion enrichment with Amberlite XAD-2 functionalized with Tiron: analytical applications, 1221
- Differential pulse voltammetric indirect determination of aluminium in drinking waters, blood, urine, hair, and medicament samples using L-dopa under alkaline conditions, 1299
- Comparison between sequential extraction procedures and single extractions for metal partitioning in sewage sludge samples, 1353
- Determination of saccharides in wastewater from the beverage industry by microdialysis sampling, microbore high performance anion exchange chromatography and integrated pulsed electrochemical detection, 1379
- Trace-level determination of 1,4-dioxane in water by isotopic dilution GC and GC-MS, 1403
- A restricted access medium column for the trace determination of triadimefon and tetriconazole in water with large-volume injection coupled-column RPLC with UV detection, 1549
- An electrochemical approach to the determination of dinobuton: a study of water samples, 1645
- Visual fluorimetry of trace aluminium by specific immobilization with *o,o'*-dihydroxyazobenzene on an octadecylsilanized silica thin layer, 1667
- On-line concentration in micellar electrokinetic chromatography for triazine determination in water samples: evaluation of three different stacking modes, 1725
- Determination of non-ionic surfactants and polar degradation products in influent and effluent water samples and sludges of sewage treatment plants by a generic solid-phase extraction protocol, 1733
- Simultaneous amperometric detection of electroinactive anions and cations in ion chromatography, 1799
- Determination of sulfide in waters by flow-injection solid phase spectrophotometry, 1835
- Non-invasive determination of ethanol, propylene glycol and water in a multi-component pharmaceutical oral liquid by direct measurement through amber plastic bottles using Fourier transform near-infrared spectroscopy, 2054
- Automated *in situ* preparation of Azomethine-H and the subsequent determination of boron in fertilizer process and water effluent streams with sequential injection analysis, 2094
- Fluorimetric flow injection and flow-through sensing systems for cyanide control in waste water, 2100
- A mediator-type biosensor as a new approach to biochemical oxygen demand estimation, 2280
- Development of an automated method for determining oil in water by direct aqueous supercritical fluid extraction coupled on-line with infrared spectroscopy, 2356
- WAVELET TRANSFORM**
- Comparison of wavelet transform and Fourier self-deconvolution (FSD) and wavelet FSD for curve fitting, 915
- WINE**
- Electrochemical studies of complexation of Pb in red wines, 743
- Evaluation of similarities between natural and accelerated browning of fino sherry wines by chemometric techniques, 1151
- Multisyringe flow system: determination of sulfur dioxide in wines, 1501
- X-RAY DIFFRACTION**
- Calcium carbonate phase analysis using XRD and FT-Raman spectroscopy, 251
- X-RAY FLUORESCENCE SPECTROMETRY**
- Separation and enrichment of palladium and gold in biological and environmental samples, adapted to the determination by total reflection X-ray fluorescence, 397
- Homogeneous liquid-liquid extraction followed by X-ray fluorescence spectrometry of a microdroplet on filter-paper for the simultaneous determination of small amounts of metals, 797
- Fusion method for preparation of refractory nickel based alloy powders for X-ray fluorescence spectrometry, 1681
- X-RAY PHOTOELECTRON SPECTROSCOPY**
- Surface energy and the response of transverse acoustic wave devices in liquids, 1525
- Assessment of X-ray photoelectron spectroscopy for analysis of particulate pollutants in urban air, 1703
- ZINC**
- Properties of the ion-selective electrode with a chelating pseudo-liquid membrane phase for zinc determination, 527
- Atomic absorption spectrometric determination of trace zinc in alloys and biological samples after preconcentration with [1-(2-pyridylazo)-2-naphthol] on microcrystalline naphthalene, 1865
- Normal and differential demasking flow-injection manifold for the direct spectrophotometric determination of zinc(II) in biological materials and pharmaceutical formulations, 2106
- ZIRCONIUM**
- Determination of trace zirconium and hafnium in basaltic rocks by inductively coupled plasma atomic emission spectrometry after chemical separation: an evaluation of two methods based on extraction chromatography, 453
